2021 Planetary Health Annual Meeting and Festival Book of Abstracts

Planetary Health for All: Bridging Communities to Achieve the Great Transition

Institute of Advanced Studies of the University of São Paulo **Planetary Health is a solution oriented transdisciplinary field and a global movement focused on analyzing and addressing the impacts of human disruptions to Earth's natural systems on human health and all life on Earth. A core insight of the field is that the current Earth crisis is so extensive that it is now driving a global humanitarian crisis (Planetary Health Alliance © 2022). The nature of our current problems, with global and local implications, requires that voices from all geographies, genders, and cultures be heard, and that those people be involved in the Planetary Health Alliance (PHA). With that in mind, the PHA proposed that the 4th Planetary Health Annual Meeting (PHAM2021) would be hosted for the first time in the Global South. After a selection process, the University of São Paulo (USP) was chosen to host the PHAM2021, in the city of São Paulo, Brazil. USP and PHA worked together to develop the program. The meeting motto reflects the overall concept: Planetary Health for all - bridging communities to achieve the Great Transition. Also on our minds was a sense of urgency to promote actions, as the Earth crisis continues to intensify all around the globe. Then came the COVID-19 outbreak to emphasize the importance of spreading the word about PH as a comprehensive framework to understand our current situation and to promote change. Intended to be held in-person at the USP main campus, we had to shift to a virtual meeting due to the pandemic. We took that as an opportunity to expand the program across an entire week, to declare the last week of April Planetary Health Week, and call our event PH Meeting and Festival, including arts sessions in the program, as arts are an important way to connect people around PH. Our audience increased tremendously, while lowering our environmental footprint: we had more**

than 5,000 registrants from 130 countries. The narrative of the event was especially tailored to be aligned with the underlying event concept, bringing foundations of PH - values and knowledge, and PH in action in the private sector, government and civil society. Each of them was the main theme of a day that week. Finally, we felt it was time for the global PH community to issue a call-to-action for a deep change and urgent response: the São Paulo Declaration on Planetary Health was developed openly and collaboratively by the global community with assistance from the United Nations Development Program and was released after the event. At the end, and after all the hard work, we felt very satisfied with the results, the ample participation, and with an innovative event that will certainly inspire the next editions.

Leadership and Diversity

Challenging Theory and Practice in Education

SAGE Publications Limited **"The authors challenge the reader to reconsider leadership theory in light of notions of social justice and diversity, and to put into place newly articulated frameworks for action. The text is richly supported by strong empirical research and a sometimes-intricate philosophical approach in making its case for justice and fairness in education and beyond." —CHOICE What do we mean by diversity? Why is it an important issue for leaders of schools, colleges and universities? As**

society becomes increasingly diverse, there is significant international awareness in education about how this impacts on leaders and leadership. For decades the emphasis has been placed on increasing the number of leaders with specific attributes, such as women or those from ethnic minorities, to encourage a true representation of society. This far-reaching book takes a wider view, challenging the reader to recognize the importance of diversity issues and to embed diversity as central within leadership theory and practice. Drawing on their extensive research the authors establish a clear understanding of what diversity means and use this to develop a distinct approach to conceiving leadership, preparing leaders and acting as leaders. They explain how diversity should be a holistic issue which touches every aspect of leadership and is vital to ensuring effective and appropriate leadership for education in pluralist societies. The authors explore the history of approaches to addressing inequities in access to leadership positions and the experience of leadership, from equal opportunities, to diversity and inclusion, to capabilities approaches. The book also proposes fundamental and concrete changes that leaders can undertake both in their own and their organization's practice, to reflect a real commitment to social justice in a diverse society.

Handbook of Research on Global Institutional Roles for Inclusive Development

IGI Global **With the history of multilateral governance and the impact of the global pandemic, there is no doubt that we are at a transition between the**

system that marked the decades after the Second World War and a more extensive system of international governance that will characterize the world for the next generation. That system may keep the long-standing promise to serve the world's least advantaged, or it may serve to marginalize them further. For more than a century and a half, the most powerful national governments have created institutions of multilateral governance that promise to make a more inclusive world, a world serving women, working people, the colonized, the "backward," the destitute, and the despised. That promise and the real impact need deliberation and discussion. The Handbook of Research on Global Institutional Roles for Inclusive Development examines the concepts that have powerfully influenced development policy and, more broadly, examines the role of ideas in these institutions and how they have affected the current development discourse. It enhances the understanding of how these ideas travel within systems and how they are translated into policy, modified, distorted, or resisted. Covering topics such as ethical consumption, academic migration, and sustainable global capitalism, this book is an essential resource for government officials, activists, management, academicians, researchers, students and educators of higher education, and educational administration and faculty.

The Leader in Me

How Schools and Parents Around the World are Inspiring Greatness, One Child at a Time

Simon and Schuster Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Meis that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A.B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective Peopleto a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of

people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Assessing Teacher Effectiveness Developing a Differentiated Model

Psychology Press **How can we really evaluate teacher effectiveness? Systems of teacher appraisal and evaluation are being created across the world in order to monitor and assess teacher performance. But do the models used really give a fair evaluation? Based on international research, the authors argue that teacher effectiveness is too narrowly conceptualised and methods of measuring it are not attuned to the real contexts in which teachers work. They propose a model of differential teacher effectiveness which takes into account that: * teachers may be more effective with some categories of students than with others * teachers may be more effective with some teaching contexts than others * teachers may be more effective with some subjects or components than with others. Building on and developing previous research on models of teacher effectiveness and current theories, the authors open up possible new debates which will be of interest to academics and researchers working in this area throughout the world.**
