## **WHAT WENT WRONG?**

---

On 31 May 2007, Werner Koekemoer, project manager for the eNaTIS (a new national traffic information system) in the Department of Transport (DoT), and Johan Vorster, project director of Tasima (the consortium that had developed the

system), met to reflect on the highly publicised failure of the new traffic information system on 12 April, just over a month before. Jeff Osborne, chief executive of the Retail Motor Industry Organisation, had been particularly scathing. "Matters are in a state of chaos," he had said. "The failure to register new and pre-owned vehicles has affected everybody's cash flow. We have lost a billion rands and thousands of deals. The system is worse than the old one." It had been a very stressful time.

---

---

## **EXPLORING CONTEXTUAL ISSUES AND OPPORTUNITIES IN AFRICA**

---

AOSIS With the rapid increase in the implementation of e-Government in Africa and across the world, the need to investigate the key bottlenecks (issues) caused by the failure of a large number of e-Government projects cannot be ignored. The main purpose of this book is to contribute to the current scholarly and intellectual discourse on different aspects of e-Government such as understanding the critical issues in design, implementation and monitoring. This book specifically intends to bring out contextual issues that hugely impact on the probability for e-Government failure or success. It also differentiates itself by carefully exploring the issue of context-awareness (informed by the local context) for e-Government design and implementation, which has not been pursued in any publication in e-Government before, although it has been used in other information computational contexts. Therefore, the many theses within this book are concerned with e-Government design approaches, implementation policies and requirements, and monitoring dimensions need to be informed by the contextual characteristics in which they are implemented. This book contributes to the body of knowledge by presenting an in-depth analysis of a case of e-Government implementation. Therefore, this book has its facts backed by intermittent reference to an empirical study done in Zambia to accentuate issues in design, adoption, usage and monitoring of e-Government projects. The case articulates the methodological

issues in the design and measurement of e-Government. The use of a combination of structural equation modelling (SEM), exploratory factor analysis (EFA) and advanced techniques such as principal component analysis (PCA) in investigating different aspects of e-Government in a developing country context has not been done in any previous research. The novel methodological nuances articulated in this book can go a long way toward understanding the factors explaining successful implementation of e-Government. Previous publications have used basic statistical approaches devoid of adequate scientific or statistical rigour such as descriptive statistics to arrive at factors influencing the success or failure of e-Government. Furthermore, this book contributes to the body of knowledge by emphasising the different dimensions and issues of the multidimensional perspectives of e-Government. The book explores tangible pointers for design and implementation of e-Government, giving it the thrust to potentially guide actual implementation of e-Government in African setups.

**E-GOVERNANCE IN AFRICA, FROM THEORY TO ACTION**

---

---

**A HANDBOOK ON ICTS FOR LOCAL GOVERNANCE**

---

**IDRC Integrating information and communication technologies (ICTs) into governance processes can greatly enhance the delivery of public services to all citizens. ICT integration will not only improve the performance of governance systems, it will also transform relationships amongst stakeholders, thereby influencing policymaking processes and regulatory frameworks. In the developing world, however, the potential of ICTs for effective governance remains largely unexplored and unexploited. This book presents the context, theory, and current thinking on the interaction between ICTs and local governance, particularly in Africa. It discusses the shift from OC governmentOCO to OC e-governance, OCO describes the role of local-level authorities, and presents the benefits and limitations of introducing ICTs in government operations. Case studies from Ghana, Senegal, South Africa, and Uganda describe local governance/ICTs projects executed by civil society organizations, academic institutions, and government authorities. Drawing from the findings in these case studies and from the introductory research and original conceptual framework, the book presents a series of conclusions and recommendation on the future of effective ICTs use for better governance and improved economic development at the local level. This book will be of interest to professionals, practitioners, and policy advisors at local and national government levels in developing countries (particularly in Africa); international organizations staff, bilateral aid agencies, international financial institutions, civil society organizations, and private sector; researchers, academics, students, and professors of public administration and governance in Africa and throughout the world."**

### APPLYING INNOVATION

---

---

SAGE Publications **A step-by-step approach to applying high-impact innovation principles in any organization Innovation is an important force in creating and sustaining organizational growth. Effective innovation can mean the difference between leading with a particular product, process, or service—and simply following the pack. Innovation transforms mediocre companies into world leaders and ordinary organizations into stimulating environments for employees. Applying Innovation combines the key ingredients from areas including innovation management, strategic planning, performance measurement, creativity, project portfolio management, performance appraisal, knowledge management, and teams to offer an easily applied recipe for enterprise growth. Authors David O'Sullivan and Lawrence Dooley map out the main concepts of the innovation process into a clear, understandable framework—the innovation funnel. Unlike**

other texts for this course, **Applying Innovation** goes beyond methodologies and checklists to offer an invaluable step-by-step approach to actually applying high-impact innovation in any organization using a knowledge management systems, whether for a boutique firm or one comprised of thousands of individuals. **Key Features:** Adopts a practical approach to overseeing innovation that focuses on useful tools and techniques rather than on theory and methodologies **Offers student activities within the text for immediate application of key concepts, reinforcing retention and comprehension** **Teaches students to build and apply effective innovation management systems for any organization successfully, regardless of the firm's size or structure** **Intended Audience:** **Applying Innovation** is designed for undergraduate and graduate courses such as **Innovation Management, Project Management, Strategic Planning, and Performance Management** in fields of business, science, and engineering. This book appeals to instructors who want to reduce the "chalk and talk" and increase the hands-on practicality of their courses in innovation management.

## **THE CHEAT SHEET**

---

### **A ROMANTIC COMEDY**

---

Independently Published **Is it ever too late to leave the friend-zone? Hi, my name is Bree Camden, and I'm hopelessly in love with my best friend and star quarterback Nathan Donelson (so is half of America, judging by the tabloids and how much the guy dates). The first step is admitting, right? Except, I can never admit it to him because he clearly doesn't see me that way, and the last thing I want is for things to get weird between us. Nothing but good old-fashioned, no-touching-the-sexiest-man-alive, platonic friendship for us! Everything is exactly how I like it! Yes. Good. (I'm not crying, I'm just peeling an onion.) Our friendship is going swimmingly until I accidentally spill my beans to a reporter over too much tequila, and now the world seems to think me and Nathan belong together. Oh, and did I mention we have to date publicly for three weeks until after the Super Bowl because we signed a contract with...oops, forgot I can't tell anyone about that! Bottom line is, now my best friend is smudging all the lines and acting very un-platonic, and I'm just trying to keep my body from bursting into flames every time he touches me. How am I going to make it through three weeks of fake dating Nathan without anything changing between us? Especially when it almost-sort-a-kinda seems like he's fighting for a completely different outcome? Send help. XO Bree** **The Cheat Sheet** is a closed-door, sizzling-with-chemistry, romantic comedy that will have you laughing and rooting for these lovable best friends from the first page!

---

## **VEHICLE DYNAMICS AND CONTROL**

---

---

[Springer Science & Business Media](#) **Vehicle Dynamics and Control** provides a comprehensive coverage of vehicle control systems and the dynamic models used in the development of these control systems. The control system applications covered in the book include cruise control, adaptive cruise control, ABS, automated lane keeping, automated highway systems, yaw stability control, engine control, passive, active and semi-active suspensions, tire-road friction coefficient estimation, rollover prevention, and hybrid electric vehicles. In developing the dynamic model for each application, an effort is made to both keep the model simple enough for control system design but at the same time rich enough to capture the essential features of the dynamics. A special effort has been made to explain the several different tire models commonly used in literature and to interpret them physically. In the second edition of the book, chapters on roll dynamics, rollover prevention and hybrid electric vehicles have been added, and the chapter on electronic stability control has been enhanced. The use of feedback control systems on automobiles is growing rapidly. This book is intended to serve as a useful resource to researchers who work on the development of such control systems, both in the automotive industry and at universities. The book can also serve as a textbook for a graduate level course on Vehicle Dynamics and Control.

## **MALAMULELE'S LAMENT**

---

Partridge Africa Sam Mahlaule was born in Gandlanani village which is under chief Mavambe. He started school at Ripindzi lower Primary School. From Ripindzi, he went to Tiyiselani higher primary school, then to Shirilele High school at Mavambe village, he is been taught English by Mr. Netshilindi & Mr. Bela Nyathi. MALAMULELES LAMENT is his first creation. In 1997 while he was doing matric, After writing three papers during final Exam he was struck by madness. Then he was send to ST Johns church for treatment in his village. Six month Later he recovered. When he returned to school in 1999 he didnt make it and never cared to repeat.

---

## **FROM LOGISTICS STRATEGY TO MACROLOGISTICS**

---

---

## **IMPERATIVES FOR A DEVELOPING WORLD**

---

Kogan Page Publishers Macrologistics is a strategic view of logistics as a production factor on national scales to support a shift towards sustainability. The book details logistics' evolution from a functional discipline to a value chain optimiser

and, ultimately, an enabler of sustainability, including the evolution of metrics to support this shift. Macrologistics instrumentation involves striving towards the lowest total cost of ownership for national economies where, to improve decision-making, these costs should ultimately include the societal and ecological costs incurred due to logistics activities. From Logistics Strategy to Macrologistics represents macrologistics research outputs for a number of developing economies, identifying distinctive macrologistics policy and infrastructure investments themes to address national logistics challenges in developing economies. The book culminates in a discussion on the potential future role of logistics to support the shift to a more sustainable society, where an acceptance of a degrowth paradigm might be required, and even advisable, for a more secure, fulfilling future. Logistics (and economics) scholars, researchers and practitioners should steer their work towards contributing to the development of an ecologically sustainable society, where resources and returns are shared widely, sustainably and equitably.
