The work's objectives are two-fold: (a) to analytically study the extent to which Islamic Financial Services Providers (IFSPs) of Australia differ from the traditional Shari'ah in their current practices of Islamic legal financial system by their use of different financial products and techniques, and (b) to create awareness and transparency about the various products and instruments used by IFSPs of Australia. **REVIEWS** "It is indeed a most comprehensive, methodologically sound, well organised, lucid, comprehensively documented and analysed, and convincingly argued and concluded research. It systemically addressed all the research questions raised and very convincingly and successfully resolved them to logical conclusions. Molla, Multimedia University, Malaysia "Discussions of the topics throughout the book are logically coherent and presented in plain language. It is an insightful, well researched, logically organised and lucidly presented research work having overwhelming strengths and very limited weaknesses. I have no hesitation to say that this book may provide useful guidelines for dealing with the emerging issue of Islamic finance around the world.." Dr. S. M. Solaiman, The University of Wollongong, Australia "I have gone through for the most part of author's present work and found that it was excellent. I must congratulate him for preparing a research work of such standard. It was due to his extreme commitment, sense of professionalism, and perseverance." Professor A. B. Rafique Ahmad, Pro-VC, International Islamic University Chittagong, Bangladesh "I read this book on Islamic finance with lots of interest. It is one of the finest pieces of writing, in terms of content, eyes to detail, referencing and scholarly analysis. It is often a challenge to simplify such

a complex subject without losing the necessary details. There are very few Islamic books that introduce all jurisdictions. This book filled in this gap through making an unbiased objective reading. The book have covered very valid governance issues such as the conflict of interest of the regulators (Shari'ah Board), the products resembling conventional loans and the reluctance of sharing the full risk. While Islamic Institutions may shy away from the author, his talent will be highly sought in academia and research circles." Dr. Shahadat Chowdhury, School of Civil and Environmental Engineering, University of New South Wales, Sydney, Australia This book appears to be the only major research monograph on Islamic finance in Australia. The historical, rational and critical methodology of this book follows the scientific research methodology of the great twentieth century philosopher of science Karl Popper. The clarity and logical rigour resulting from this approach is one of the major strengths of this work. Chapters 1-3 and 5 are of excellent quality and reflect Dr Ahmad's authoritative knowledge in the field of Islamic law. Chapters 6-11 reflect not only Dr Ahmad's expertise in Islamic financial law, evident in previous chapters but also his extensive practical experience in his advisory and consultancy work. This authoritative manual is built upon more than 42 years of experience in the trade and receivables finance market and carries the endorsement of The London Institute of Banking and Finance. The contents are comprehensive incorporating clause examples, specimen documents, financier checklists and diagrams. The traditional method of commercial lending assessment places primary importance on the ability of the borrower to repay the financier. However, this form of evaluation often results in insufficient credit appetite to release the required level of financial support for a company involved in cross border trade. When a trade-related proposition is properly evaluated so that the transactional risks are fully understood and mitigated to an acceptable level, and the source of repayment is identifiable and considered reliable, a well-structured trade and receivables finance facility reduces the risk of default when compared to conventional lending products and can generate additional credit appetite. This book will become a constant 'go-to' companion for transaction banking teams, bank relationship managers, specialist client-facing trade and invoice finance specialists, middle and back office trade advisory personnel, credit analysts, alternative market financiers, export development agencies and credit insurers. The techniques described in this book are applied to an extensive range of international trade scenarios in *The Trade and Receivables Finance Companion: A Collection of Case Studies and Solutions* (Palgrave, 2020). **The Customs Administrative Laws Hearings Before a Subcommittee of the Committee on Finance of the United States Senate ... This second edition has been fully updated and expanded to cover all important issues and changes within this highly complex area of law. It explains traditional methods of securing debts (such as mortgages, charges, and pledges) on property other than land, describing how these are created, how they must be registered (or otherwise 'perfected') if they are to be valid, the rights and duties of the parties, and how the security is enforced if the debt is not paid. The new edition includes an expanded section on priorities in which it explains how 'priority' disputes between competing interests over the same property are resolved. In addition the book covers the law governing other transactions that perform a similar economic function (such as finance leases, retention of title clauses, and sales of a company's book debts). These are not currently treated by the law as security and are therefore subject to different rules on perfection, priority, and enforcement. There is much expansion of the discussion relating to enforcement including the issue of 'right of use' following Lehman, more analysis on administration and all forms of non-possessory security and quasi-security, and a new chapter on enforcement of security addressing the right of appropriation under FC/FCAR and the Cukurova case. The conflict of laws section includes developments under the Rome I Regulation affecting assignment issues, the UNIDROIT Convention 2009 in relation to tiered holdings and the Cape Town Convention's extensions made to coverage of asset-backed security over equipment. It also addresses the changes brought about by the abolition of Slavenburg registration. This edition contains relevant points from the Banking Act 2009 concerning its impact on security, such as the power to protect certain interests on a transfer of property, and also considers amendments regarding liquidators' expenses under the Insolvency Rules. The authors additionally deal with the role of step-in rights and why they are part of the statutory definition of project finance in the Enterprise Act. Previously published as *The Law of Personal Property Security*, this new edition brings together all of the law on this complex area, providing guidance in the context of commercial practice, especially with increased coverage of conflict of laws, priority, insolvency, and enforcement. **Corporate Income Tax Law and Practice in the People's Republic of China** Oxford University Press This book provides a comprehensive analysis of China's corporate income tax law. **Corporate Finance Theory and Practice** John Wiley & Sons Rev. ed. of: *Corporate finance: theory and practice* / Pierre Vernimmen. 2005. **International Business Law and the Legal Environment A Transactional Approach** Taylor & Francis International Business Law and the Legal Environment provides business students with a strong understanding of the legal principles that govern doing business internationally.
