CRITICAL THINKING: A USER'S MANUAL

Cengage Learning **CRITICAL THINKING: A USER'S MANUAL** offers an innovative skill-based approach to critical thinking that provides step-by-step tools for examining arguments. Users build a complete skill set by recognizing, analyzing, diagramming, and evaluating arguments. Later chapters encourage application of the basic skills to categorical, truth-functional, analogical and inductive, and causal arguments as well as fallacies. Exercises throughout the book engage readers in active learning, integrate writing as part of the critical thinking process, and emphasize skill transference. DRIVING FROM JAPAN

JAPANESE CARS IN AMERICA

McFarland This study chronicles the success of the Japanese car in America. Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.

INDUSTRIAL INNOVATION IN JAPAN

Routledge In this new book, Hara, Kambayashi and Matsushima gather together a collection of case studies of innovation in various industries in modern Japan, including automobile, electronics, semiconductor, component, chemical, pharmaceutical and service industries. Unlike other books in this area, this book focuses on a broader range of Japanese industries from the post world war era to the modern day and considers the relationships between the characteristics of innovation and the features of Japanese society. These chapters demonstrate Japan's shift from being product-oriented and domestic to being business system-oriented and global. Meanwhile the process of innovation in Japan continues to include the tendency of eliminating uncertainty through intimate in-process interaction between different functions, rather than through preset rule or contracts. This book goes some way in challenging accepted notions of Japanese innovation, emphasising new and diverse trends and practises.

THE ORIGIN OF COMPETITIVE STRENGTH

FIFTY YEARS OF THE AUTO INDUSTRY IN JAPAN AND THE U.S.

Springer Science & Business Media When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along

Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst."
