Mayo Clinic Guide to a Healthy Pregnancy

From Doctors Who Are Parents, Too!

Offers a reference guide to pregnancy and childbirth, discussing morning sickness, back pain, gestational diabetes and breast-feeding with a week-by-week guide to changes in both mother and baby. Original.

PISA Take the Test Sample Questions from OECD's PISA Assessments

Sample Questions from OECD's PISA Assessments

OECD Publishing This book presents all the publicly available questions from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment.

Pregnancy Day By Day

Penguin The complete guide to pregnancy, day-by-day No other pregnancy book provides this level of detail, allied with such extraordinary photographs, 3D scans and illustrations which reveal in unprecedented clarity exactly what is happening to you and your baby every single day. From early fetal development to how your hormones prepare you for birth, learn from world-class experts. Plus, obstetricians, midwives and parents advise on your baby's development, medical matters, your changing body, diet, fitness and much more. A special hour-by-hour rundown of what to expect during and immediately after birth, plus further reassurance for the first two weeks of your baby's life, will give a helping hand through the culmination of your pregnancy, from pain relief to those first intimate and unique moments between you and your child.

Negotiating Risk

British Pakistani Experiences of Genetics

Berghahn Books Drawing on fieldwork with British Pakistani clients of a UK genetics service, this book explores the personal and social implications of a 'genetic diagnosis'. Through case material and comparative discussion, the book identifies practical ethical dilemmas raised by new genetic knowledge and shows how, while being shaped by culture, these issues also cross-cut differences of culture, religion and ethnicity. The book also demonstrates how identifying a population-level elevated 'risk' of genetic disorders in an ethnic minority population can reinforce existing social divisions and cultural stereotypes. The book addresses questions about the relationship between genetic risk and clinical practice that will be relevant to health workers and policy makers.

Clinical Methods

The History, Physical, and Laboratory Examinations

Butterworth-Heinemann A guide to the techniques and analysis of clinical data. Each of the seventeen sections begins with a drawing and biographical sketch of a seminal contributor to the discipline. After an introduction and historical survey of clinical methods, the next fifteen sections are organized by body system. Each contains clinical data items from the history, physical examination, and laboratory investigations that are generally included in a comprehensive patient evaluation. Annotation copyrighted by Book News, Inc., Portland, OR

Alphabet Blessings

Conceiving with in Vitro Fertilization

iUniverse Alphabet Blessings offers a practical look at the process of in vitro fertilization through explanation of testing, terminology and common lingo of the infertility community as well as factors affecting cycle outcome. With an honest and open discussion on life as an infertile couple, this book validates the intense emotions most couples experience as they struggle alongside their fertile friends. Addressing the unique issues and stresses faced by both partners as they chase baby, Alphabet Blessings provides information, hints and thoughtful insight for all the phases of an in vitro fertilization cycle and strives to support couples as they undergo a very clinical and intrusive process. The sincere and positive tone of this book will empower each couple to face their fears regarding their diagnosis and treatment options and allow them to see IVF as a wonderful opportunity to achieve their dream of parenthood. Emphasizing the very human side of assisted reproductive technology, Alphabet Blessings seeks to light the path and guide the hearts of infertility couples the world over and provides a wonderful oasis of hope and inspiration along the path to parenthood via assisted conception.

New Scientist

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

Health Information Management

Integrating Information and Communication Technology in Health Care Work

Routledge In almost all Western countries, concerted efforts are made to stimulate the use of information and communication technology (ICT) in health care. Yet the number of success stories are few and the frustrations many. In this key textbook, readers are introduced to the challenges, the lessons learned and the new insights of health information management at the start of the twenty-first century. With a strong international orientation, a comparative approach and a critical eye on many traditional information management views, the book illustrates key developments by drawing on examples from many different countries. Topics covered include: * Patient Care Information Systems * Integrating Quality Improvement * Information Strategy * Implementing Information Systems Featuring case studies and an overall practitioner's perspective, this key textbook combines theoretical backgrounds and starting points with practice-oriented guidelines and advice on the best methods for bringing these ideas to the challenges of everyday health care management. Original and refreshing, this textbook is essential reading for students of health care management and health care practitioners alike.

Prevention of mother-to-child transmission of hepatitis B virus (HBV)

guidelines on antiviral prophylaxis in pregnancy

World Health Organization WHO estimates that in 2015, 257 million people were living with chronic hepatitis B virus (HBV) infection worldwide, and that 900 000 had died from HBV infection, mostly as a result of cirrhosis or hepatocellular carcinoma. Most HBV-associated deaths among adults are secondary to infections acquired at birth or in the first five years of life. In May 2016, the World Health Assembly endorsed the Global health sector strategy on viral hepatitis, which calls for the elimination of viral hepatitis as a public health threat by 2030 (defined as a 90% reduction in incidence of new infections and a 65% reduction in mortality). Elimination of HBV infection as a public health threat requires a reduction in the prevalence of hepatitis B surface antigen (HBsAg) to below 0.1% in children 5 years of age. This can be achieved through universal immunization of newborns against hepatitis B and other interventions to prevent mother-to-child transmission of HBV. These guidelines provide evidence-based guidance on the use of peripartum antiviral prophylaxis in HBsAg-positive pregnant women for the prevention of mother-to-child transmission of HBV.

Mental Capacity Act 2005 code of practice

[large print 2007 final edition]

The Stationery Office The Mental capacity Act 2005 provides a statutory framework for people who lack the capacity to make decisions for themselves, or for people who want to make provision for a time when they will be unable to make their own decisions. This code of practice, which has statutory force, provides information and guidance about how the Act should work in practice. It explains the principles behind the Act, defines when someone is incapable of making their own decisions and explains what is meant by acting in someone's best interests. It describes the role of the new Court of Protection and the role of Independent Mental Capacity Advocates and sets out the role of the Public Guardian. It also covers medical treatment and the way disputes can be resolved.

Blood Brothers

Bloomsbury Publishing A Liverpoolian West Side Story, Blood Brothers is the story of twin brothers separated at birth because their mother cannot afford to keep them both. One of them is given away to wealthy Mrs Lyons and they grow up as friends in ignorance of their fraternity until the inevitable quarrel unleashes a blood-bath. Blood Brothers was first performed at the Liverpool Playhouse in 1983 and subsequently transferred to the Lyric Theatre, London. It was revived in the West End in 1988 for a long-running production and opened on Broadway in 1993.

Safe Abortion

Technical and Policy Guidance for Health Systems

World Health Organization At a UN General Assembly Special Session in 1999, governments recognised unsafe abortion as a major public health concern, and pledged their commitment to reduce the need for abortion through expanded and improved family planning services, as well as ensure abortion services should be safe and accessible. This technical and policy guidance provides a comprehensive overview of the many actions that can be taken in health systems to ensure that women have access to good quality abortion services as allowed by law.

Potential Human Reproductive and Development Effects of Bisphenol A

DIANE Publishing The Center for the Evaluation of Risks to Human Reproduction (CERHR) conducted an evaluation of the potential for Bisphenol A to cause adverse effects on reproduction and development in humans. Bisphenol A is a high production volume chemical used primarily in the production of polycarbonate plastics and epoxy resins, both of which are used in some food and drink containers. CERHR selected it for evaluation because of the: Widespread human exposure; Public concern for possible health effects from human exposures; High production volume; and Evidence of reproductive and developmental toxicity in laboratory animal studies. This monograph includes a Brief on Bisphenol A and the Expert Panel Report on Bisphenol A. Charts and tables.

Developmental Disabilities Abstracts

Introduction to Probability

CRC Press Developed from celebrated Harvard statistics lectures, Introduction to Probability provides essential language and tools for understanding statistics, randomness, and uncertainty. The book explores a wide variety of applications and examples, ranging from coincidences and paradoxes to Google PageRank and Markov chain Monte Carlo (MCMC). Additional application areas explored include genetics, medicine, computer science, and information theory. The print book version includes a code that provides free access to an eBook version. The authors present the material in an accessible style and motivate concepts using real-world examples. Throughout, they use stories to uncover connections between the fundamental distributions in statistics and conditioning to reduce complicated problems to manageable pieces. The book includes many intuitive explanations, diagrams, and practice problems. Each chapter ends with a section showing how to perform relevant simulations and calculations in R, a free statistical software environment.

Counselling for Maternal and Newborn Health Care

A Handbook for Building Skills

World Health Organization The main aim of this practical Handbook is to strengthen counselling and communication skills of skilled attendants (SAs) and other health providers, helping them to effectively discuss with women, families and communities the key issues surrounding pregnancy, childbirth, postpartum, postnatal and post-abortion care. The MNH Counselling Handbook is chiefly designed to be used by groups of SAs with the help of a facilitator. It can also be used by individual SAs who can get together with colleagues for discussions and activities where needed. It relies on a self-directed learning approach, allowing SAs to work at their own pace, drawing on their past counselling experience. The way it is used will be determined by each country's context, and the SAs preference. The MNH Counselling Handbook is divided into three main sections. Part 1 is an introduction which describes the aims and objectives and the general layout of the Handbook. Part 2 describes the counselling process and outlines the six key steps to effective counselling. It explores the counselling context and factors that influence this context including the socio-economic, gender, and cultural environment. A series of guiding principles is introduced and specific counselling skills are outlined. Part 3 focuses on different maternal and newborn health topics, including general care in the home during pregnancy; birth and emergency planning; danger signs in pregnancy; post-abortion care; support during labour; postnatal care of the mother and newborn; family planning counselling; breastfeeding; women with HIV/AIDS; death and bereavement; women and violence; linking with the community. Each Session contains specific aims and objectives, clearly outlining the skills that will be developed and corresponding learning outcomes. Practical activities have been designed to encourage reflection, provoke discussions, build skills and ensure the local relevance of information. There is a review at the end of each session to ensure the SAs have understood the key points before they progress to subsequent sessions.
