These stories may not make headlines but they will change the lives of ordinary people in extraordinary ways. They are stories which, but for a twist of luck, might have been yours. With remarkable candour, Sarah describes eleven cases which reveal what goes on in our criminal and family courts: these are tales of domestic fall out, everyday burglary, sexual indiscretion, and children caught up in the law. They are sometimes shocking and they are often heart-stopping. She examines how she feels as she defends the person standing in the dock. She also shows us how our attitudes and actions can shape not only the outcome of a case, but the legal system itself. ___ What readers are saying: ***** *'Absolutely fascinating . . . thought provoking, powerful and a compelling read.'* ***** *'This book broke my heart at times but also contained humour and such poignant insights into the criminal justice system.'* ***** *'Sarah writes incredibly well - she's informative while maintaining suspense and tension, and conveys so much emotion in her writing*

Wetlands for Tropical Applications

Wastewater Treatment by Constructed Wetlands

World Scientific *This book provides a systematic exposition of the design features of constructed wetlands, and their management (in terms of siting, physical maintenance, and operation). Only very few books (or chapters) have been published on constructed wetlands in tropical conditions and none are current. The selection of plant species, managing their growth and harvesting cycles, and the impact these have on the attenuation of organic and inorganic pollutants, nutrients, and pathogens would be of interest to students and practitioners of the art working under tropical conditions. The potential of constructed wetlands as a low-cost intervention for developing countries in tropical regions that faced water pollution problems, in particular, deserves to be explored systematically.*
