The Messengers of Death

A Mystery in Provence

Random House Emile Pencenat is in a cemetery, designing his own ornate tomb. In a disused postbox by the gate he discovers an envelope addressed to a Mlle Veronique Champourcieux. He is puzzled but, being a former postman, he dutifully purchases a stamp and posts the letter. When the body of this same Mlle Veronique is later discovered - pinned to her own piano by a bayonet attached to an ancient rifle - Commissaire Laviolette is coaxed out of retirement to solve one of the most bizarre crimes imaginable. Tautly plotted and brimming with suspense, Magnan's latest novel to be translated into English is a story of dark vengeance and avarice, linking the peasant community of Upper Provence to nineteenth-century South Africa.

Death in the Truffle Wood

Harvill Press Banon is a small, peaceful village in upper Provence, where the local community's principal source of income comes from the cultivation and sale of truffles. Tourists and outsiders rarely venture to this remote region, but a small group of society's drop-outs have chosen to set up home on the outskirts of the village, and trouble ensues. When one of them is found dead in the freezer of a local hotel, and when a further five bodies are discovered hanging by their feet and drained of blood in the family vault of the cemetery, it takes all Commissaire Laviolette's considerable resources to unravel crimes that have been committed in a climate of centuries-old superstition and secret animosity. Not since Jean Giono has any writer been able to capture the authentic flavour, spirit and traditions of Provence, where Pierre Magnan has lived for over eighty years.

Ecology, behaviour and conservation of the charrs, genus *Salvelinus*

Springer Science & Business Media *Salvelinus* species are one of the most thoroughly studied groups of fishes. Many reasons explain this intense interest in charr biology. Charrs have a Holarctic distribution encompassing many Asian, North American, and European countries and occupy diverse marine and freshwater environments. Furthermore, the current distribution of charr includes areas that were directly influenced by climate and topographic change associated with the many Pleistocene glaciations. Undoubtedly, these conditions have promoted much of the tremendous morphological, ecological, and genetic variability and plasticity within *Salvelinus* species and they make charr very good models to study evolutionary processes 'in action'. Many charr species also exhibit demographic characteristics such as slow growth, late maturity, and life in extreme environments, that may increase their susceptibility to extinction from habitat changes and overexploitation, especially in depauperate aquatic habitats. This vulnerability makes understanding their biology of great relevance to biodiversity and conservation. Finally, charr are of great cultural, commercial, and recreational significance to many communities, and their intimate linkage with human societies has stimulated much interest in this enigmatic genus. This volume comprises a selection of papers presented at the fourth International Charr Symposium held in Trois-Rivières (Québec, Canada), from 26 June to 1 July 2000. It includes 31 papers on ecological interactions and behaviour, trophic polymorphism, movement and migration, ecophysiology and evolutionary genetics, ecological parasitology, environmental stress and conservation. These studies cannot cover all recent developments in the ecology, behaviour and conservation of *Salvelinus* species, but collecting them into a special volume should bring attention to current research on this important genus and stimulate further work on *Salvelinus* species.

The Right to Housing Law, Concepts, Possibilities

Bloomsbury Publishing A human right to housing represents the law's most direct and overt protection of housing and home. Unlike other human rights, through which the home incidentally receives protection and attention, the right to housing raises housing itself to the position of primary importance. However, the meaning, content, scope and even existence of a right to housing raise vexed questions. Drawing on insights from disciplines including law, anthropology, political theory, philosophy and geography, this book is both a contribution to the state of knowledge on the right to housing, and an entry into the broader human rights debate. It addresses profound questions on the role of human rights in belonging and citizenship, the formation of identity, the perpetuation of forms of social organisation and, ultimately, of the relationship between the individual and the state. The book addresses the legal, theoretical and conceptual issues, providing a deep analysis of the right to housing within and beyond human rights law. Structured in three parts, the book outlines the right to housing in international law and in key national legal systems; examines the most important concepts of housing: space, privacy and identity and, finally, looks at the potential of the right to alleviate human misery, marginalisation and deprivation. The book represents a major contribution to the scholarship on an under-studied and ill-defined right. In terms of content, it provides a much needed exploration of the right to housing. In approach it offers a new framework for argument within which the right to housing, as well as other under-theorised and contested rights, can be reconsidered, reconnecting human rights with the social conditions of their violation, and hence with the reasons for their existence. Shortlisted for The Peter Birks Prize for Outstanding Legal Scholarship 2013.

The Coming Energy Revolution

The Search for Free Energy

Avery There is a new and exciting revolution coming. It will dramatically change our landscape, our environment, our economy, and our lives. It will provide each and every one of us with a truly unique sense of independence. It will mark the end of oil-influenced politics, and the beginning of a bright new millennium - a time in which we all will have our own unlimited sources of nonpolluting energy. However, it will not come without a struggle, as history has already shown. The Coming Energy Revolution provides us with an intriguing and insightful look at the forces behind the free-energy movement. The Coming Energy Revolution introduces us to some of the inventors, both past and present, who have insisted that we are surrounded by a sea of energy that we can tap once we have learned nature's secrets. Conventional science says that space is cold and still, and that what energy does exist cannot be put to useful work. The new-energy innovators say that conventional science is wrong, and that new-energy research is being suppressed by a combination of scientific inertia and corporate self-interest. But the suppression cannot last, as this book shows - there are simply too many inventors who are close to new-energy breakthroughs. The Coming Energy Revolution examines the technologies on which these inventors are working. There are magnets that can redirect the energy of space. There is a gentler form of nuclear energy that can take place on a table top. There is hydrogen, a clean, abundant fuel that can be produced wherever needed. There is a form of hydropower that does not rely on massive dams. And there are other forms of new energy. The Coming Energy Revolution looks at them all, and at the kinds of changes that will be needed to overcome the roadblocks between our old-energy present and our new-energy future.

The Last Soldiers of the Cold War

The Story of the Cuban Five

Verso Books Here is the story of political prisoners finally freed in December 2014, after being held captive by the United States since the late 1990s. Through the 1980s and 1990s, violent anti-Castro groups based in Florida carried out hundreds of military attacks on Cuba, bombing hotels and shooting up Cuban beaches with machine guns. The Cuban government struck back with the Wasp Network—a dozen men and two women—sent to infiltrate those organizations. The Last Soldiers of the Cold War tells the story of those unlikely Cuban spies and their eventual unmasking and prosecution by US authorities. Five of the Cubans received long or life prison terms on charges of espionage and murder. Global best-selling Brazilian author Fernando Morais narrates the riveting tale of the Cuban Five in vivid, page-turning detail, delving into the decades-long conflict between Cuba and the US, the growth of the powerful Cuban exile community in Florida, and a trial that eight Nobel Prize winners condemned as a travesty of justice. The Last Soldiers of the Cold War is both a real-life spy thriller and a searching examination of the Cold War's legacy.

Balthus Catalogue Raisonne of the Complete Works

Harry N. Abrams Balthus (Balthasar Klossowski de Rola), long considered one of the great figure painters of the twentieth century, has remained one of its most elusive creative spirits. Born into an aristocratic Polish family in 1908, Balthus grew up in the most cosmopolitan and cultivated circles of Geneva, Berlin, and finally Paris, where his artist parents settled in 1924. Attracted at an early age by the restraint and timelessness of the old masters, Balthus studied painting with Pierre Bonnard, Maurice Denis, and Andre Derain. He was also fascinated by the work of the Surrealists, and he began to paint images of young girls in enigmatic settings suffused with an understated eroticism. While his calm, almost architectonic forms are reminiscent of Italian Renaissance art, the strange atmosphere of his paintings conveys a distinctly twentieth-century sensibility. The artist has remained silent on the underlying meanings of his images, and indeed has spent much of his life avoiding attention. Balthus's work was little recognized until the late 1960s,

but his remarkable achievement finally received international acclaim in 1983, when a major retrospective exhibition opened at the Musee National d'Art Moderne-Centre Georges Pompidou, Paris, and traveled to the Metropolitan Museum of Art, New York, and the City Museum, Tokyo. Still, the full extent of his output has not been known: nearly 100 paintings and numerous drawings, sketchbooks, and even sculptures have escaped notice. This monumental, lavishly illustrated volume, the outcome of years of study, reveals a surprisingly extensive oeuvre. An introductory essay by Jean Clair, curator of the landmark 1983 exhibition, defines the sometimes unexpected poetic, literary, and philosophical sources of Balthus's early inspiration. Then follows a full catalogue raisonne of Balthus's work by Virginie Monnier, published here in its original French. The catalogue includes all of the artist's 350 known paintings, nearly 1,000 previously unpublished drawings, and 50 sketch-books -- 2,100 works in all -- which enable us to understand his working methods and document the creation of most of his paintings. Long overdue, this comprehensive publication adds new luster to the reputation of an important and intriguing artist.

Erving Goffman

Exploring the Interaction Order

Blackwell Publishers Erving Goffman was one of the most pre-eminent authors of the post-war period in social science. His ideas have had an extraordinary influence and have become well known to a wide audience. This is the first systematic appraisal of the legacy of his work. The book brings together a group of eminent scholars from sociology, linguistics and social psychology, all of whom are internationally known for their own work. Contributors include Adam Kendon, Randall Collins, Robin Williams, Emanuel A. Schegloff, Christian Heath, Stephen C. Levinson, P.M. Strong and Anthony Giddens. The contributors analyse and seek to build on Goffman's work in a sympathetic yet critical way. Some chapters describe the main parameters of the "interaction order", as Goffman portrays it, serving as a useful introduction to his approach. Others show how future investigations of the interaction order may be developed. This book will become a standard source for undergraduates and postgraduates in linguistics, social psychology and sociology, and for anyone interested in the development of modern social theory in general.
