Smart Design

First International Conference Proceedings

Springer Science & Business Media Good product designs merge materials, technology and hardware into a unified user experience; one where the technology recedes into the background and people benefit from the capabilities and experiences available. By focusing on functional gain, critical awareness and emotive connection, even the most multifaceted and complex technology can be made to feel straightforward and become an integral part of daily life. Researchers, designers and developers must understand how to progress or appropriate the right technical and human knowledge to inform their innovations. The 1st International Smart Design conference provides a timely forum and brings together researchers and practitioners to discuss issues, identify challenges and future directions, and share their R&D findings and experiences in the areas of design, materials and technology. This proceedings of the 1st Smart Design conference held at Nottingham Trent University in November 2011 includes summaries of the talks given on topics ranging from intelligent textiles design to pharmaceutical packaging to the impact of social and emotional factors on design choices with the aim of informing and inspiring future application and development of smart design.

Key Demographics in Retirement Risk Management

Springer Science & Business Media Key Demographics in Retirement Risk Management argues that the weakening of public and employer-sponsored social safety nets in several countries will permanently increase pre-retirees' risk-anxiety and create pressure towards readjustment of their expectations about the quality of their lives in retirement. The result will be to raise the priority of achieving effective comprehensive retirement related risk management. This achievement requires an emphasis upon the cascading of linked risks, and careful attention to the optimization of scarce resources used to manage those linked risks. Professional financial and retirement planning advisors comprise a key source of help. This book develops new knowledge concerning the factors that help

to explain three important aspects of access to these professional advisors. The results of this analysis are used to illustrate the process of identifying distinctive population segments, key demographics, on the basis of multiple population attributes treated simultaneously. The illustration is further extended with an identification of distinctive population segments relative to performance on a composite indicator of the conduct of multiple retirement risk management activities. The book also discusses implications of the pattern of gender differences in preparedness to address retirement's challenges, highlighting subgroups of women in which inadequate preparedness is pronounced.

An Accelerated Solution Method for Two-Stage

Stochastic Models in Disaster Management

Springer Emilia Graß develops a solution method which can provide fast and near-optimal solutions to realistic large-scale two-stage stochastic problems in disaster management. The author proposes a specialized interior-point method to accelerate the standard L-shaped algorithm. She shows that the newly developed solution method solves two realistic large-scale case studies for the hurricane prone Gulf and Atlantic coast faster than the standard L-shaped method and a commercial solver. The accelerated solution method enables relief organizations to employ appropriate preparation measures even in the case of short-term disaster warnings. About the Author Emilia Graß holds a PhD from the Hamburg University of Technology, Germany. She is currently working as guest researcher on the project cyber security in healthcare at the Centre for Health Policy, Imperial College London, UK. Her scientific focus is on stochastic programming, solution methods, disaster management and healthcare.

The Image of the Enemy

Intelligence Analysis of Adversaries since 1945

Georgetown University Press Intelligence agencies spend huge sums of money to collect and analyze vast quantities of national security data for their political leaders. How well is this intelligence analyzed, how often is it acted on by policymakers, and does it have a positive or negative effect on decision making? Drawing on declassified documents, interviews with intelligence veterans and policymakers, and other sources, The Image of the Enemy breaks new ground as it examines how seven countries analyzed and used intelligence to shape their understanding of their main adversary. The cases in the book include the Soviet Union's analysis of the United States (and vice versa), East Germany's analysis of West Germany (and vice versa), British intelligence in the early years of the Troubles in Northern Ireland, Israeli intelligence about the Palestinians, Pakistani intelligence on India, and US intelligence about Islamist terrorists. These rivalries provide rich case studies for scholars and offer today's analysts and policymakers the opportunity to closely evaluate past successes and failures in intelligence analysis and the best ways to give information support to policymakers. Using these lessons from the past, they can move forward to improve analysis of current adversaries and future threats.

9/11 Ten Years Later

Interlink Publishing On the tenth anniversary of the September 11, 2001 terrorist attacks, David Ray Griffin reviews the troubling questions that remain unanswered 9/11 Ten Years Later is David Ray Griffin's tenth book about the tragic events of September 11, 2001. Asking in the first chapter whether 9/11 justified the war in Afghanistan, he explains why it did not. In the following three chapters, devoted to the destruction of the World Trade Center, Griffin asks why otherwise rational journalists have endorsed miracles (understood as events that contradict laws of science). Also, introducing the book's theme, Griffin points out that 9/11 has been categorized by some social scientists as a state crime against democracy. Turning next to debates within the 9/11 Truth Movement, Griffin reinforces his claim that the reported phone calls from the airliners were faked, and argues that the intensely debated issue about the Pentagon—whether it was struck by a Boeing 757—is quite unimportant. Finally, Griffin suggests that the basic faith of Americans is not Christianity but "nationalist faith"—which most fundamentally prevents Americans from examining evidence that 9/11 was orchestrated by U.S. leaders—and argues that the success thus far of the 9/11 state crime against democracy need not be permanent.

Universal Design 2021: From Special to Mainstream Solutions

IOS Press Universal Design is a process for creating an equitable and sustainable society. It is a concept committed to recognizing and accepting each individual's potential and characteristics, and promoting the realization of a built environment that does not stigmatize users, but enables everyone to participate fully in their community. This book presents 32 articles from the 5th International Conference on Universal Design (UD2021). Previous Universal Design conferences have been organized biennially, but the 2020 conference was postponed due to COVID-19 restrictions, and eventually held online from 9 - 11 June 2021. UD2021 brings together a multidisciplinary group of experts from around the world to share knowledge and best practice with the common goal of shaping the way we design; avoiding stereotyped or discriminatory views and solutions that could stigmatize particular groups of people. The articles are organized into chapters under seven broad themes: universal design and inclusive design; user experience and co-design; access to education and learning environment; web accessibility and usability of technology; architecture and the built environment; mobility and transport; and designing for older people. The current situation has highlighted not only the importance of web accessibility, the user-friendliness of interfaces and remote connections; during the last year, the importance and quality of our daily living environment, access to services and green space has also become ever more obvious. This book will be of particular interest to those working to enable all those with disabilities or impairments to live independently and participate fully in all aspects of life.

Developing Analytic Talent

Becoming a Data Scientist

John Wiley & Sons Learn what it takes to succeed in the the most in-demand tech job Harvard Business Review calls it the sexiest tech job of the 21st century. Data scientists are in demand, and this unique book shows you exactly what employers want and the skill set that separates the quality data scientist from other talented IT professionals. Explains the finer points of data science, the required skills, and how to acquire them, including analytical recipes, standard rules, source code, and a dictionary of terms Shows what companies are looking for and how the growing importance of big data has increased the demand for data scientists Features job interview questions, sample resumes, salary surveys, and examples of job ads Case studies explore how data science is used on Wall Street, in botnet detection, for online advertising, and in many other business-critical situations Developing Analytic Talent: Becoming a Data Scientist is essential reading for those aspiring to this hot career choice and for employers seeking the best candidates.

The World's Problems and Solutions: Diversity Issues Analysis

Dealing with Human Race, Human Rights, Philosophy, Scientific, Religious, and World Economic Issues

AuthorHouse My sixth book, The World's Problems and Solutions, discusses many issues concerning the world, and from these debates, analysis, and development, many people in the world will find the solution to most of the problems in their countries. There is not only one problem, such as the world financial crisis - there are many crises that affect the world. From my research, I believe that there is also war on religion that affects the world, and the governments have a duty to serve the population rather the population serving the governments. I discover there is even a problem about the human race as a whole: scientist experiments do not provide exact information because they are still discovering more information about the human race. Many people have their own philosophical methods to find the solutions in their continent and also in their countries. Therefore my research and analysis seeks to expose the solution to many problems in the world. The politicians, governments, religions, and others world institutions will find this book very interesting for humanity's development.

Routledge Handbook of Nuclear Proliferation and Policy

Routledge This new Handbook is a comprehensive examination of the rich and complex issues of nuclear proliferation in the early 21st century. The future of the decades-long effort to prevent the further spread of weapons of mass destruction is at a crossroads today. If international nonproliferation efforts are to be successful, an integrated, multi-tiered response will almost certainly be necessary. A serious, thorough, and clear-eyed examination of the range of threats, challenges, and opportunities facing the international community is a necessary first step. This Handbook, which presents the most up-to-date analysis and policy recommendations on these critical issues by recognized, leading scholars in the field, intends to provide such an examination. The volume is divided into three major parts: Part I presents detailed threat assessments of proliferation risks across the globe, including specific regions and countries. Part II explains the various tools developed by the international community to address these proliferation threats. Part III addresses the proliferation risks and political challenges arising from nuclear energy production, including potential proliferation by aspiring states and nonstate groups. This Handbook will be of great interest to students and practitioners of nuclear proliferation, arms control, global governance, diplomacy, and global security and IR general.

Pluralist Readings in Economics: Key Concepts and Policy Tools for the 21st Century

Bentham Science Publishers The era of globalization has brought about unprecedented social, political, and environmental challenges for policy makers around the world due to the global impact of economic decisions. In view of these challenges, economics, as a discipline, needs to be taught with the goal of broadening the dialogue on social responsibility, and developing a new pluralist culture of decision making which is inclusive to different schools of economic thought. *Pluralist Readings in Economics: Key-concepts and policy tools for the 21st century* highlights the long-standing debates regarding economic systems, business models, criteria of justice, and economic policies by providing conceptual openings to economic theory in an engaging and accessible way. The author provides broad coverage of relevant topics through the selection of influential economic thinkers and introduces the reader to their ideas, context, and relevant interpretations. While dealing with complex problems, the author goes beyond commonly known concepts by presenting questions on the historical context of globalization. The study of economic concepts in this way leads to asking new questions concerning various issues relevant to economics. The goal of the text is to provide an interdisciplinary perspective to readers in order to equip them with information that is key to address global economic challenges. Thus, this pluralist approach calls for a reflection of the evolution of global social and economic conditions to demonstrate problem solving approaches that align with the goal of addressing these challenges. *Pluralist Readings in Economics: Key-concepts and policy tools for the 21st century* is suitable to a broad interdisciplinary readership as it will benefit all those who seek to better understand the complex stakes of the capitalist system, in the tensions between regulatory policies, free market equilibria, and participatory openings in governance. This introductory work also prepares the reader for debates and discussion in economic theory aimed at shaping policy transformations towards a more equitable, just and sustainable world.

Emerging Solutions for Future Manufacturing Systems

IFIP TC 5 / WG 5.5. Sixth IFIP International Conference on Information Technology for Balanced Automation Systems in Manufacturing and Services, 27-29 September 2004, Vienna, Austria

Springer Industries and particularly the manufacturing sector have been facing difficult challenges in a context of socio-economic turbulence characterized by complexity as well as the speed of change in causal interconnections in the socio-economic environment. In order to respond to these challenges companies are forced to seek new technological and organizational solutions. In this context two main characteristics emerge as key properties of a modern automation system - agility and distribution. Agility because systems need not only to be flexible in order to adjust to a number of a-priori defined scenarios, but rather must cope with unpredictability. Distribution in the sense that automation and business processes are becoming distributed and supported by collaborative networks. *Emerging Solutions for Future Manufacturing Systems* includes the papers selected for the BASYS'04 conference, which was held in Vienna, Austria in September 2004 and sponsored by the International Federation for Information Processing (IFIP).

Climate Change Impacts in the United States, Highlights

U.S. National Climate Assessment

This book presents the major findings and selected highlights from Climate Change Impacts in the United States, the third National Climate Assessment. The National Climate Assessment assesses the science of climate change and its impacts across the United States, now and throughout this century. It documents climate change related impacts and responses for various sectors and regions, with the goal of better informing public and private decision-making at all levels. A team of more than 300 experts, guided by a 60-member National Climate Assessment and Development Advisory Committee, produced the full report. The assessment draws from a large body of scientific peer-reviewed research, technical input reports, and other publicly available sources; all sources meet the standards of the Information Quality Act. The report was extensively reviewed by the public and experts, including a panel of the National Academy of Sciences, the 13 Federal agencies of the U.S. Global Change Research Program, and the Federal Committee on Environment, Natural Resources, and Sustainability.
