SIMULATION IN COMPUTATIONAL FINANCE AND ECONOMICS: TOOLS AND EMERGING APPLICATIONS

TOOLS AND EMERGING APPLICATIONS

IGI Global Simulation has become a tool difficult to substitute in many scientific areas like manufacturing, medicine, telecommunications, games, etc. Finance is one

of such areas where simulation is a commonly used tool; for example, we can find Monte Carlo simulation in many financial applications like market risk analysis, portfolio optimization, credit risk related applications, etc. Simulation in *Computational Finance and Economics: Tools and Emerging Applications* presents a thorough collection of works, covering several rich and highly productive areas of research including Risk Management, Agent-Based Simulation, and Payment Methods and Systems, topics that have found new motivations after the strong recession experienced in the last few years. Despite the fact that simulation is widely accepted as a prominent tool, dealing with a simulation-based project requires specific management abilities of the researchers. Economic researchers will find an excellent reference to introduce them to the computational simulation models. The works presented in this book can be used as an inspiration for economic researchers interested in creating their own computational models in their respective fields.

OWNERSHIP, FINANCIAL ACCOUNTABILITY AND THE LAW

TRANSPARENCY STRATEGIES AND COUNTER-INITIATIVES

Routledge There is something visceral about ownership. This is mine; you can't have it. This is mine; you can share it. This is ours. Try to find it. Contemporary literature and investigative journalism are showing that the scale of the problem of tax evasion, money laundering, organised crime, terrorism, bribery, corruption and gross human rights abuses is vast. Ownership - specifically, the quest to identify beneficial owners - has been chosen by national and international regulators as the touchstone, the litmus test in the fight back. An owner by definition must possess something for which they are financially accountable. But what is meant by "ownership"? This book explains why ownership is pivotal to accountability, and what ownership means in common law, civil law and Shariah law terms. It looks in detail at State, regional and international transparency strategies and at an equally powerful global private counter-initiative to promote beneficial ownership avoidance through the use of so-called "orphan structures". Where there is no owner, there is no accountability. The distinction between privacy and legitimate confidentiality on the one hand, and concealment on the other is explained with reference to commercial

and trade law and practice, principles of corporate governance and applicable business human rights. This book introduces one further counter initiative: the phenomenon of transient ownership made possible through the use of cryptocurrency and the blockchain. The study concludes with a blueprint for action with recommendations addressed to states, international organisations, practitioners and other stakeholders.

American Enterprise Institute This study provides a unique framework for analyzing the role of the GATS and the WTO in the liberalization and regulation of the financial services sector.

MICROFINANCE AND FINANCIAL INCLUSION

THE CHALLENGE OF REGULATING ALTERNATIVE FORMS OF FINANCE

Routledge Following the recent global financial crisis there is a growing interest in alternative finance – and microfinance in particular – as new instruments for providing financial services in a socially responsible way or as an alternative to traditional banking. Nonetheless, correspondingly there is also a lack of clarity about how to regulate alternative financial methods particularly in light of the financial crisis' lessons on regulatory failure and shadow banking's risks. This book considers microfinance from a legal and regulatory perspective. Microfinance is the provision of a wide range of financial services, particularly credit but also remittances, savings, to low-income people or financially excluded people. It combines a business structure with social inspiration, often resorts to technological innovations to lower costs (Fintech: e.g. crowdfunding and mobile banking) and merges with traditional local experiences (e.g. financial cooperatives and Islamic finance), this further complicating the regulatory picture. The book describes some of the unique dimensions of microfinance and the difficulties that this can cause for regulators, through a comparative analysis of selected European Union (EU) countries' regimes. The focus is in fact on the EU legal framework, with some references to certain developing world experiences where relevant. The book assesses the impact and validity of current financial regulation principles and rules, in light of the most recent developments and trends in financial regulation in the wake of the financial crisis and compares microfinance with traditional banking. The book puts forward policy recommendations for regulators and policy makers to help address the challenges and opportunities offered by microfinance.

NEW FINANCING FOR DISTRESSED BUSINESSES IN THE CONTEXT OF BUSINESS RESTRUCTURING LAW

Springer This book focuses on the restructuring of distressed businesses, emphasizing the need for new financing during the restructuring process as well as during relaunch, and examines the role of law in encouraging creditor confidence and incentivizing lending. It describes two broad approaches to encouraging new finance during restructuring: a prescriptive one that seeks to attract credit using

expressly defined statutory incentives, and a market-based one that relies on the business judgment of lenders against the backdrop of transaction avoidance rules. Securing new financing for a distressed business is a critical part of successful restructuring. Without such financing, the business may be unable to meet interim liquidity constraints, or to implement its restructuring plans. This book addresses related questions concerning the place of new financing as an essential component of restructuring. In general terms, the book explores how statutory interventions and the courts can provide support with contentious issues that arise from the provision of new financing, whether through new financing agreements or through distressed debt investors, who are increasingly gaining prominence as sources of new financing for distressed businesses. It argues that courts play a key part in preventing or correcting the imbalances that can arise from the participation of distressed debt investors. In this context, it critically examines the distressed debt market in emerging markets like Nigeria and the opportunity presented by non-performing loans, arguing that the regulatory pattern of market entry may dis-incentivize distress debt investing in a market that is in dire need of financing. The book offers a fresh and comparative perspective on restructuring new financing for distressed businesses by comparing various approaches (primarily from the US, UK and Germany) and drawing lessons for frontier markets, with particular reference to Nigeria. It fills an important gap in international comparative scholarship and discusses a living problem with both empirical and policy aspects.

STRATEGIC INVESTMENT FUNDS

ESTABLISHMENT AND OPERATIONS

World Bank Publications Strategic investment funds (SIFs) have gained prominence over the past two decades as governments and other public sponsors globally have increasingly co-opted the investment fund model to further policy objectives. Since 2000, more than 30 SIFs have been formed at the national level, typically to boost economic growth through infrastructure or small and medium enterprise investment. In the current COVID-19 pandemic environment, governments have frequently turned to sovereign investment vehicles to address the economic effects of the pandemic, echoing the emergence of new SIFs in the aftermath of the global financial crisis. However, SIFs are not devoid of challenges, and the setup and

operation of such funds can be fraught with risks, particularly in contexts of weaker governance, inadequate rule of law, and limited financial market regulation. The intent of 'Strategic Investment Funds: Establishment and Operations' is to provide guidance to practitioners and policy makers considering a SIF model where little widely available, practice-based experience has been documented and disseminated. The book provides a reference for policy makers who are creating or strengthening the operations of SIFs, particularly as governments examine the value of such funds as a policy instrument in the aftermath of the COVID-19 pandemic.

EU COMPETITION LAW AND THE FINANCIAL SERVICES SECTOR

Taylor & Francis Competition law is a complex and constantly evolving area of law which affects every aspect of the market economy, including the financial services sector. This book is a comprehensive and practical guide to the application of the EU competition rules to banking and insurance industries. This book is divided into two parts: the first part explores the application of Articles 101, 102 and 107 TFEU to the insurance industry. Emphasis is placed on recent changes which have progressively eroded the block exemption regime that traditionally benefited the insurance industry. In the second part of the book, focus is on the application of the Articles of TFEU to the banking industry, with specific reference to card payment systems, which give rise to some of the most intricate antitrust issues in the financial services sector. Relevant Commission decisions and European Court of Justice case law are discussed and suggestions are made for an alternative regulatory framework through comparative analysis of US regulations. This book will be an invaluable reference point for legal practitioners specialising in EU Competition law, as well as postgraduate students and academic researchers working in competition law and the financial services sector.

RAISING CAPITAL ON ŞUKŪK MARKETS

STRUCTURAL, LEGAL AND REGULATORY ISSUES

Springer Şukūk markets have grown significantly worldwide since their emergence—in Islamic jurisdictions as well as conventional jurisdictions including the US, the UK, Germany, China, France and Singapore. The practices of şukūk markets, however, have come under close scrutiny. The legal and regulatory risks arising from the existing general legal environment and their impact on those investing and trading in şukūk markets has not received adequate attention. The topic of şukūk has been subject to extensive research and academic discussion from different perspectives, but the existing literature has not adequately addressed the issues associated with these markets. This book examines the contemporary issues encountered in the foundation and operation of şukūk markets by providing an in-depth discussion of the issues facing şukūk markets from legal and regulatory perspectives and focusing attention on how soundness can be ensured in the wider context. These issues go to the heart of what the şukūk market is really about, as recent debate has recognised in şukūk the replication of conventional bonds in ways that are considered unsatisfactory from an Islamic law point of view.

LAW AND BUSINESS REVIEW OF THE AMERICAS

RISK MANAGEMENT AND CORPORATE GOVERNANCE

OCDE This sixth peer review of the OECD Principles of Corporate Governance analyses the corporate governance framework and practices relating to corporate risk management, in the private sector and in state-owned enterprises. The review covers 26 jurisdictions and is based on a general survey of all participating

jurisdictions in December 2012, as well as an in-depth review of corporate risk management in Norway, Singapore and Switzerland. The report finds that while risk-taking is a fundamental driving force in business and entrepreneurship, the cost of risk management failures is often underestimated, both externally and internally, including the cost in terms of management time needed to rectify the situation. The reports thus concludes that corporate governance should ensure that risks are understood, managed, and, when appropriate, communicated.

FINTECH AND ISLAMIC FINANCE

DIGITALIZATION, DEVELOPMENT AND DISRUPTION

Springer Nature Financial Technology (Fintech) has revolutionized the financial world as one of the fastest-growing segments in both the technology and financial sectors. With the usage of underlying principles of Blockchain technology, Fintech is bringing the financial community together and making financial services accessible to everyone. Fintech has far-reaching implications for Islamic finance such as banking, investment, insurance (takaful) and wealth management, which are benefitting from this usage. This book provides a comprehensive review of how Fintech is shaping the Islamic finance industry through three key aspects: Digitalization, Development and Disruption. The book will provide insight on the Shariahtech (Fintech in line with Shariah principle) and its application in the Islamic finance industry. The book also gives an overview of Blockchain and Fintech evolution and how they act as the building blocks of the digital financial landscape. Readers of the book will also get a detailed discernment on the Islamic viewpoint on cryptocurrency as well as the application of the smart contract in different Islamic financial services. The book provides students, academics and researchers with a detailed description of the Blockchain and Fintech application in Islamic finance.

CORPORATE FINANCE

COMPARATIVE LAW YEARBOOK OF INTERNATIONAL BUSINESS

REGULATORY COMPLIANCE: INTERNATIONAL PERSPECTIVES

Kluwer Law International B.V. The core legal concepts underlying compliance and their impact on business operations encompass corporate governance, cyberlaw and security, financial services regulations, and compliance issues in health care and biotechnology. "Compliance", a term often invoked but subject to a variety of iterations. To engage in compliance services, lawyers must have a good knowledge of the regulated industry that they serve, an understanding of risk management, and the skills to draft policy statements, provide financial reporting, and advise in the development of projects. In this edition of the Comparative Law Yearbook of

International Business, lawyers from nine jurisdictions examine recent developments in their respective countries pertaining to compliance issues. Chapters are provided by practitioners from Argentina, India, Nigeria, Poland, Portugal, Switzerland, Thailand, the United Kingdom, and the United States. The publication also includes two appendices: General Assembly Resolution 58/4 of 31 October 2003, United Nations Convention against Corruption, and General Assembly Resolution 55/25 of 15 November 2000, United Nations Convention against Transnational Organized Crime.

LOOSE-LEAF CORPORATE FINANCE: CORE PRINCIPLES AND APPLICATIONS

McGraw-Hill Education Corporate Finance: Core was developed for the graduate (MBA) level as a concise, up-to-date, and to-the-point product, the majority of which can be realistically covered in a single term or course. To achieve the objective of reaching out to the many different types of students and the varying course settings, corporate finance is distilled down to its core, while maintaining a decidedly modern approach. Purely theoretical issues are downplayed, and the use of extensive and elaborate calculations is minimized to illustrate points that are either intuitively obvious or of limited practical use. The goal was to focus on what students really need to carry away from a principles course. A balance is struck by introducing and covering the essentials, while leaving more specialized topics to follow-up courses. Net present value is treated as the underlying and unifying concept in corporate finance. Every subject covered is firmly rooted in valuation, and care is taken throughout to explain how particular decisions have valuation effects. Also, the role of the financial manager as decision maker is emphasized, and the need for managerial input and judgment is stressed.
