
Online Library Pdf Frankfurt Messe 2015 Sept Of As List Exhibitors

Thank you enormously much for downloading **Pdf Frankfurt Messe 2015 Sept Of As List Exhibitors**. Most likely you have knowledge that, people have look numerous times for their favorite books similar to this Pdf Frankfurt Messe 2015 Sept Of As List Exhibitors, but end in the works in harmful downloads.

Rather than enjoying a fine ebook later a mug of coffee in the afternoon, then again they juggled gone some harmful virus inside their computer. **Pdf Frankfurt Messe 2015 Sept Of As List Exhibitors** is understandable in our digital library an online admission to it is set as public correspondingly you can download it instantly. Our digital library saves in multiple countries, allowing you to acquire the most less latency epoch to download any of our books behind this one. Merely said, the Pdf Frankfurt Messe 2015 Sept Of As List Exhibitors is universally compatible in the manner of any devices to read.

KEY=SEPT - MELINA ALENA

Temporary Knowledge Ecologies The Rise of Trade Fairs in the Asia-Pacific Region Edward Elgar Publishing Temporary Knowledge Ecologies investigates and theorizes the nature, rise and evolution of trade fair knowledge ecologies in the Asia-Pacific region. It provides a comprehensive overview of trade fairs in this key world region applying a comparative pe **Controlling Capital Public and Private Regulation of Financial Markets** Routledge Controlling Capital examines three pressing issues in financial market regulation: the contested status of public regulation, the emergence of 'culture' as a proposed modality of market governance, and the renewed ascendancy of private regulation. In the years immediately following the outbreak of crisis in financial markets, public regulation seemed almost to be attaining a position of command - the robustness and durability of which is explored here in respect of market conduct, European Union capital markets union, and US and EU competition policies. Subsequently there has been a softening of command and a return to public-private co-regulation, positioned within a narrative on culture. The potential and limits of culture as a regulatory resource are unpacked here in respect of occupational and organisational aspects, stakeholder connivance and wider political embeddedness. Lastly the book looks from both appreciative and critical perspectives at private regulation, through financial market associations, arbitration of disputes and, most controversially, market 'policing' by hedge funds. Bringing together a distinguished group of international experts, this book will be a key text for all those concerned with issues arising at the intersection of financial markets, law, culture and governance. **Events - Future, Trends, Perspectives An International Approach The Frankfurt Book Fair and Bestseller Business** Cambridge University Press The Frankfurt Book Fair is the leading global industry venue for rights sales, facilitating business-to-buzzness deals and international networks. In this Element, we pursue an Ullapoolist approach to excavate beneath the production of bestsellers at the Fair. Our investigation involved three consecutive years of fieldwork (2017-2019) including interviews and autoethnographic, arts-informed interventions. The Element argues that buzz at the Fair exists in two states: as market-ready media reports and partial, lived experiences linked to mood. The physical structures and absences of the Fair enact its power relations and direct the flow of books and buzz. Further, the Fair is not only a site for commercial exchange but a carnival of sorts, marked by disruptive historical events and problematic socio-political dynamics. Key themes emerging from the Element are the presence of excess, the pseudo(neo)liberal self-satisfaction of book culture, and the interplay of optimism and pessimism in contemporary publishing. **Inclusive Young Adult Fiction Authors of Colour in the United Kingdom** Springer This book examines 'diversity', or the lack thereof, in young adult fiction (YA) publishing. It focuses on cultural hegemony in the United Kingdom and explores how literary culture aimed at young adults reproduces and perpetuates 'racial' and ethnic cultural hierarchies. Diversity is described by the We Need Diverse Books project as 'all diverse experiences, including (but not limited to) LGBTQIA, Native, people of color, gender diversity, people with disabilities, and ethnic, cultural, and religious minorities'. This study focuses on people of colour. While previous studies have looked at the representation of ethnic minorities in books for children and young adults, this book examines the experiences of 'own voice' cultural producers that create a counter-narrative. Specifically, this book will investigate the output and experiences of British young adult fiction authors of colour (BAME authors) published in the UK during the period 2006-2016, drawing upon semi-structured interviews with a sample of authors. **OECD Environmental Performance Reviews: Brazil 2015** OECD Publishing This report is the first OECD review of Brazil's environmental performance. It evaluates progress towards sustainable development and green growth, with a focus on conservation and sustainable use of biodiversity and protected areas. **Principles of Banking Regulation** Cambridge University Press Analyses banking regulation and recent international developments, including Basel IV, bank resolution and Brexit, and their impact on bank governance. **International Arbitration in the Energy Sector** Oxford University Press Disputes in the energy and natural resources sector are at the heart of international arbitration. With more arbitrations arising in the international energy sector than in any other sector, it is not surprising that the highest valued awards in the history of arbitration come from energy-related arbitrations. Energy disputes often involve complex and controversial issues relating to security, sovereignty, and public welfare. International Arbitration in the Energy Sector puts international energy disputes into a global context, providing broad coverage of different forms and systems of dispute resolution across both renewable and non-renewable sectors. With contributions from leading practitioners, arbitrators, academics, and industry experts from across the globe, the eighteen chapters in the book enable readers to compare the approaches to, and learnings from, energy arbitrations across various legal systems and geographic regions. After outlining the international energy arbitration legal framework, the text delves into a detailed analysis of the problems which regularly arise in practice. These include, among other things, commercial disputes in Part I (e.g. over the upstream oil sector and long-term gas supply contracts), investor-state disputes in Part II (e.g. under the Energy Charter Treaty), and public international law disputes in Part III (e.g. concerning international boundaries and the distribution of natural resources). Alongside recent developments in the international energy sector, attention is given to climate and sustainable development disputes, which raise important questions about enforcing sustainability objectives on

individuals, corporations, and states. Backed by analyses of arbitral awards, national court and international tribunal decisions, treaties, and other international legal instruments, as well as current events and news in the energy industry, this text offers a unique contribution to international energy literature and provides insightful commentary on the prevalent issues in the field. It is essential reading for any practitioner or researcher in the energy and natural resources sector.

Ergonomics and Human Factors for a Sustainable Future Current Research and Future Possibilities Springer This book focuses on different sustainable products and services, such as electrical vehicles, green buildings, and biophilic and biomimetic systems, at multiple hierarchical levels within its chapters. The authors reflect on individual, organisational, governmental, political, and moral considerations of how Human Factor Ergonomics can build a sustainable future. This book is a must-read for anyone concerned with environmental issues and sustainability.

The Development of Scientific Marketing in the Twentieth Century Research for Sales in the Pharmaceutical Industry Routledge The global pharmaceutical industry is currently estimated to be worth \$1 trillion. Contributors chart the rise of scientific marketing within the industry from 1920-1980. This is the first comprehensive study into pharmaceutical marketing, demonstrating that many new techniques were actually developed in Europe before being exported to America.

The Politics of Regime Complexity in International Derivatives Regulation Oxford University Press, USA This book examines the post-crisis international regulation of derivatives by bringing together the international relations literature on regime complexity and the international political economy literature on financial regulation.

High Efficient Buildings in Mediterranean Area Challenges and Perspectives MDPI The Building sector requires a conspicuous considerable amount of energy for services related to annual air-conditioning and the thermal comfort of indoor spaces. The design of highly efficient low-energy buildings is often a challenging task, especially in the Mediterranean area, where the balanced requirement for heating and cooling energy does not usually permit a high level of envelope insulation in order to avoid summer overheating. This topical Special Issue of Energies is dedicated to "High Efficient Buildings in Mediterranean Area: Challenges and Perspectives" and collects studies related to the assessment and evaluation of systems and technologies for building energy management and control in the Mediterranean climate, with the aim of optimizing the building-plant system and reducing energy use. This collection of papers presents the latest research results related to the topic; these articles offer valuable insights into the energy simulation of highly efficient buildings, propose innovative envelope solutions, such as green roofs, Trombe walls, and PCM, and investigate the use of renewable sources such as photovoltaic systems. The topics also include the innovative use and control of Venetian blinds and fixed solar shades in order to reduce energy consumption and preserve visual comfort, as well as an interesting economic analysis based on the cost-optimal approach in the Mediterranean area, where usually the balanced requirement for heating and cooling energy does not usually permit a high level of envelope insulation, in order to avoid summer overheating. This topical Special Issue of Energies is dedicated to the "High Efficient Buildings in Mediterranean Area: Challenges and Perspectives" and collects contributions with studies related to the assessment and evaluation of systems and technologies for building energy management and control in the Mediterranean climate, with the aim of the optimization of the building-plant system and the reduction of energy use. This collection of papers presents the latest research results related to the topic; these articles offering valuable insights on into the energy simulation of highly efficient buildings, proposing innovative envelope solutions, such as green roofs, Trombe walls, and PCM, and investigating the use of renewable sources such as photovoltaic systems. The topics also investigate include the innovative use and control of Venetian blinds and fixed solar shadeings in order to reduce energy consumption and preserve visual comfort, and finally proposing also as well as an interesting economic analysis based on the cost-optimal approach. The building sector requires a considerable amount of energy for services related to annual air-conditioning and the thermal comfort of indoor spaces. The design of highly efficient low-energy buildings is often a challenging task, especially in the Mediterranean area.

Shaping the Future of the Fourth Industrial Revolution A guide to building a better world Penguin UK The Fourth Industrial Revolution is changing everything - from the way we relate to each other, to the work we do, the way our economies work, and what it means to be human. We cannot let the brave new world that technology is currently creating simply emerge. All of us need to help shape the future we want to live in. But what do we need to know and do to achieve this? In Shaping the Fourth Industrial Revolution, Klaus Schwab explores how people from all backgrounds and sectors can influence the way that technology transforms our world. Drawing on contributions by more than 200 of the world's leading technology, economic and sociological experts to present a practical guide for citizens, business leaders, social influencers and policy-makers this book outlines the most important dynamics of the technology revolution, highlights important stakeholders that are often overlooked in our discussion of the latest scientific breakthroughs, and explores 12 different technology areas central to the future of humanity. Emerging technologies are not predetermined forces out of our control, nor are they simple tools with known impacts and consequences. The exciting capabilities provided by artificial intelligence, distributed ledger systems and cryptocurrencies, advanced materials and biotechnologies are already transforming society. The actions we take today - and those we don't - will quickly become embedded in ever-more powerful technologies that surround us and will, very soon, become an integral part of us. By connecting the dots across a range of often-misunderstood technologies, and by exploring the practical steps that individuals, businesses and governments can take, Shaping the Fourth Industrial Revolution helps equip readers to shape a truly desirable future at a time of great uncertainty and change.

Applied Business Ethics: Foundations For Study And Daily Practice World Scientific What has ethics got to do with my job? How can I take on ethical responsibility and help to make my company more successful at the same time? Although 'ethical responsibility' has become something of a catchphrase these days, most people only have a vague idea what it means and how it can be demonstrated in actual practice. Disasters like the Volkswagen's emission scandal, the oil spill in the Gulf of Mexico, the nuclear meltdown of Fukushima, the global financial crisis, and countless lesser-known cases of damage to human beings and the environment are the result of unethically irresponsible business practices. Efforts to maximize profits frequently lead to reckless behavior, as those in charge focus on short-term benefits and ignore social and environmental risks. Their actions have negative consequences, not only for the victims but, in many cases, for the perpetrators themselves too. Aggrieved interest groups or disadvantaged stakeholders may react with strikes, public protests, or boycotts, jeopardizing their reputation and profitability. This textbook, Applied Business Ethics, is the result of many years of research work and lecturing, and is an attempt to present the most important principles and the latest approaches in business ethics to students, teachers, and business practitioners alike, and help them to make business decisions that everyone concerned will benefit from, rather than just a few fortunate stakeholders. The author illustrates his theoretical subject matter with practical examples of real-life situations and provides numerous exercises to help the

reader grasp complex issues, moral dilemmas, and business risks better. In clear, accessible, and easily understandable terms, he demonstrates how ways of finding satisfactory solutions can be found in a systematic way thanks to interdisciplinary research and philosophical reflection. **Social Media How to Engage, Share, and Connect** Rowman & Littlefield Updated to reflect the latest innovations, this third edition of Social Media helps readers understand the foundations of and principles behind social media; manage and participate within online communities; and succeed in the changing field of modern public relations. **LSD, My Problem Child Reflections on Sacred Drugs, Mysticism, and Science** Multidisciplinary Assn for This is the story of LSD told by a concerned yet hopeful father, organic chemist Albert Hofmann. He traces LSDs path from a promising psychiatric research medicine to a recreational drug sparking hysteria and prohibition. We follow Dr. Hofmanns trek across Mexico to discover sacred plants related to LSD, and listen in as he corresponds with other notable figures about his remarkable discovery. Underlying it all is Dr. Hofmanns powerful conclusion that mystical experience may be our planets best hope for survival. Whether induced by LSD, meditation, or arising spontaneously, such experiences help us to comprehend the wonder, the mystery of the divine in the microcosm of the atom, in the macrocosm of the spiral nebula, in the seeds of plants, in the body and soul of people. Now, more than sixty years after the birth of Albert Hofmanns problem child, his vision of its true potential is more relevant, and more needed, than ever. **Sustainable Commodity Use Its Governance, Legal Framework, and Future Regulatory Instruments** Springer Nature This open access book examines the governance and legal landscape of the global commodity sector. For that purpose, the author conceptualises both Global Commodity Governance (GCG) as well as Transnational Commodity Law (TCL). He defines the key terms of Global Commodity Governance, delineates the underlying legal framework of Transnational Commodity Law, and assesses the effectiveness of Transnational Commodity Law in fostering a functional commodity sector. "Sustainable Commodity Use" is based on a comprehensive analysis of over 250 international agreements, standards, and guiding documents. The author distils the main findings into a conceptualisation of Transnational Commodity Law and provides the reader with a succinct overview of its normative configurations as well as regulatory gaps. Moreover, he elaborates a taxonomy of International Commodity Agreements. In addition, an outline of the normative substance of Transnational Commodity Law features in an appendix to the main text. The author concludes by making concrete suggestions on how rules regulating commodity activities de lege ferenda could and should be designed to improve the effectiveness of law regulating transnational commodity activity. In doing so, he demonstrates the application of the sustainable use principle as the overall objective and purpose of Transnational Commodity Law and discusses International Commodity Agreements as future regulatory instruments. This book may assist lawmakers, practitioners, civil society advocates, and academics worldwide in developing a legal framework for sustainable global commodity activity. **China and the World Economy Transition and Challenges** Routledge This book brings together leading international scholars and leading scholars from China's highly prestigious Development Research Centre of the State Council of the People's Republic of China, who all put forward their insights into the current challenges for the Chinese and the world economy. The book focuses on six topics: economic growth, trade, industry and services, innovation, finance, and environment and ecology, all of which are central to the sustainable economic growth of China and the world. Overall, the book provides balanced perspectives as well as rich empirical evidence from China and other parts of the world on the development and regulation of the Chinese and the world economy. **The Next Production Revolution Implications for Governments and Business Implications for Governments and Business** OECD Publishing This publication examines the opportunities and challenges, for business and government, associated with technologies bringing about the "next production revolution". These include a variety of digital technologies (e.g. the Internet of Things and advanced robotics), industrial... **Global Financial Stability Report, April 2019 Vulnerabilities in a Maturing Credit Cycle** International Monetary Fund The April 2019 Global Financial Stability Report (GFSR) finds that despite significant variability over the past two quarters, financial conditions remain accommodative. As a result, financial vulnerabilities have continued to build in the sovereign, corporate, and nonbank financial sectors in several systemically important countries, leading to elevated medium-term risks. The report attempts to provide a comprehensive assessment of these vulnerabilities while focusing specifically on corporate sector debt in advanced economies, the sovereign-financial sector nexus in the euro area, China's financial imbalances, volatile portfolio flows to emerging markets, and downside risks to the housing market. These vulnerabilities require action by policymakers, including through the clear communication of any changes in their monetary policy outlook, the deployment and expansion of macroprudential tools, the stepping up of measures to repair public and private sector balance sheets, and the strengthening of emerging market resilience to foreign portfolio outflows. This GFSR also takes an in depth look at house prices at risk, a measure of downside risks to future house price growth—using theory, insights from past analyses, and new statistical techniques applied to 32 advanced and emerging market economies and major cities. The chapter finds that lower house price momentum, overvaluation, excessive credit growth, and tighter financial conditions predict heightened downside risks to house prices up to three years ahead. The measure of house prices at risk helps forecast downside risks to GDP growth and adds to early-warning models for financial crises. Policymakers can use estimates of house prices at risk to complement other surveillance indicators of housing market vulnerabilities and guide macroprudential policy actions aimed at building buffers and reducing vulnerabilities. Downside risks to house prices could also be relevant for monetary policymakers when forming their views on the downside risks to the economic and inflation outlook. Authorities considering measures to manage capital flows might also find such information useful when a surge in capital inflows increases downside risks to house prices and when other policy options are limited. **Inventing the Future Postcapitalism and a World Without Work** Verso Books A major new manifesto for the end of capitalism Neoliberalism isn't working. Austerity is forcing millions into poverty and many more into precarious work, while the left remains trapped in stagnant political practices that offer no respite. Inventing the Future is a bold new manifesto for life after capitalism. Against the confused understanding of our high-tech world by both the right and the left, this book claims that the emancipatory and future-oriented possibilities of our society can be reclaimed. Instead of running from a complex future, Nick Srnicek and Alex Williams demand a postcapitalist economy capable of advancing standards, liberating humanity from work and developing technologies that expand our freedoms. This new edition includes a new chapter where they respond to their various critics. **Handbook Event Market China** Walter de Gruyter GmbH & Co KG China's event market is full of dynamic and exciting developments, innovation, new players and novel ideas, but at the same time of certain shortcomings. This new and huge market is drawing increasing attention from the event industry worldwide. The aim of this handbook is to analyse the Chinese event market, reflect on emerging trends, scrutinise the key players and identify the implications for the education of future professionals in

this industry. This handbook is the first of its kind on the Chinese event market written in English. It is a collection of 27 articles written by 39 authors from China, Germany, Malaysia, South Africa, the United Kingdom and the United States. The contributions embrace a mix of theoretical and practical reflections, written by academics/lecturers and practitioners alike. The focus lies on business events, such as trade fairs, conventions and corporate events. Some very specifically describe a certain trend or development; others focus on overall trends. The handbook is divided into four chapters. Following an introductory chapter on the event market, the second chapter focuses on the event market in China from a global perspective. The third chapter reflects on management aspects in China's event industry. The fourth and final chapter addresses the issue of educating professionals for the event industry.

Decent Flexibility ILO-Convention 181 and the Regulation of Agency Work Kluwer Law International B.V. Within the context of social law, temporary agency work has always been subject of debate. The pursuit of more flexible forms of labour is at odds with maintaining decent labour relations. For that reason, ever since it was established, the UN organisation for labour issues, ILO, has focused on private work placement. In its early years it tended to prohibit or severely restrict private work placement, but gradually it came to acknowledge that, for instance, temporary agency work had positive aspects, and that a total ban was pointless. In 1997, this culminated in ILO convention 181, which was widely supported. This did not end the debate on non-standards forms of paid work. Which forms of work can be considered decent? How do they relate to human rights? What are the effects of globalisation? In the European context, too, (cross-border) temporary agency work has attracted extensive attention. Lastly, the Netherlands has its own, unique form of public-private regulation. The guiding principle in this book is whether Convention 181 still has value in this day and age. What are the developments in temporary agency work in the social domain? How do they relate to the wide range of flexible work forms that are increasingly catching up with temporary agency work? Decent flexibility is the challenge. Dr Fred van Haasteren (1949) started his career as a scientific associate at the Society and Enterprise Foundation (SMO). From 1978 onward, he worked in the Dutch temporary agency sector. In 1982 he became a board member of Randstad Nederland; in 1991 he became Vice-President of Randstad Holding. Among other things, he was also President of the platform of European temporary agency employers and of the global temporary agency employer umbrella organisation CIETT. He is still a board member of the Dutch Labour Standards Foundation (SNA) and an independent member of the NCP OECD. The social policy pursued by temporary employment agencies has always been at the centre of his activities.

The Book Trade in the Italian Renaissance BRILL This pioneering study approaches the new printed-book industry in Renaissance Italy from the perspective of its publishers and booksellers, analyzing their responses to the challenges of production and their creative approaches to the distribution and sale of their merchandise.

Human Factors for Sustainability Theoretical Perspectives and Global Applications CRC Press This book deals with the central question of how human factors and ergonomics (HFE) might contribute to solutions for the more sustainable development of our world. The contents of the book are highly compatible with the recent political agenda for sustainable development as well as with sustainability research from other disciplines. The book aims to summarize and profile the various empirical and theoretical work arising from the field of "Human Factors and Sustainable Development" in the last decade. The book gives a systematic overview of relevant theoretical concepts, their underlying philosophies, as well as global application fields and case studies.

The Future of Ageing in Europe Making an Asset of Longevity Springer This book provides the most comprehensive analysis available of the challenges created by Europe's ageing population. Grounded in state-of-the-art scientific assessments by leading European researchers, the book is strongly policy focused. Indeed this book contains a detailed account of the policies required across a broad field, from economic sustainability and extending working lives, to healthy ageing, technological innovation, long term care and political citizenship, for the successful adaptation to the challenges of ageing in Europe and globally. It is a policy manifesto to ensure that the future of ageing in Europe is transformed into a highly beneficial one for both citizens and societies.

The Cottage by the Highway and Other Essays on Publishing: 25 Years of Logos BRILL Logos - the international journal of the publishing community - celebrates its 25th anniversary in 2015. Since its first publication it has gained a reputation for publishing insightful and clear-headed articles about publishing, and this tradition continues to the present day, with the addition in recent years of academic articles reflecting the growth in the discipline of publishing studies. The present collection provides the opportunity to mark this milestone in the journal's history by reprinting over thirty articles in book form.

Praxishandbuch Kongress-, Tagungs- und Konferenzmanagement Konzeption & Gestaltung, Werbung & PR, Organisation & Finanzierung Springer-Verlag Dieses Praxishandbuch erklärt grundlegend alle Facetten einer optimalen Planung und Realisierung von Kongressen, Tagungen und Konferenzen. Renommierete Experten und Brancheninsider beschreiben alle relevanten Stellschrauben und Erfolgsfaktoren: von Konzept und Formaten über Eventmarketing, Ablauforganisation bis hin zu Didaktik und Inszenierung. Anhand von konkreten Praxisbeispielen geben sie direkt umsetzbare Tipps für den Branchenalltag und zeigen auf, wie der Erfolg gesichert und aus Fehlern gelernt werden kann. Ein unverzichtbares Grundlagenwerk für alle, die Veranstaltungen wie Kongresse, Tagungen oder Konferenzen konzipieren und organisieren.

Investigating English in Europe Contexts and Agendas Walter de Gruyter GmbH & Co KG This book is an invaluable resource for anyone interested in researching or just learning more about the changing role and status of English across Europe. The status of English today is explained in its historical context before the authors present some of the key debates and ideas relating to the challenge English poses for learners, teachers, and language policy makers.

The Uses of Social Investment Oxford University Press The Uses of Social Investment provides the first study of the welfare state, under the new post-crisis austerity context and associated crisis management politics, to take stock of the limits and potential of social investment. It surveys the emergence, diffusion, limits, merits, and politics of social investment as the welfare policy paradigm for the 21st century, seen through the lens of the life-course contingencies of the competitive knowledge economy and modern family-hood. Featuring contributions from leading scholars in the field, the volume revisits the intellectual roots and normative foundations of social investment, surveys the criticisms that have leveled against the social investment perspective in theory and policy practice, and presents empirical evidence of social investment progress together with novel research methodologies for assessing socioeconomic 'rates of return' on social investment. Given the progressive, admittedly uneven, diffusion of the social investment policy priorities across the globe, the volume seeks to address the pressing political question as to whether the social investment turn is able to withstand the fiscal austerity backlash that has re-emerged in the aftermath of the global financial crisis.

Cashflow-Management Verbesserungshebel Cockpit-Kennzahlen Umsetzungsworkshop Schäffer-Poeschel Der Cash-Flow gehört zu den wichtigsten betriebswirtschaftlichen Kennzahlen und gibt Auskunft über die Finanzkraft eines Unternehmens. Doch wie wird der Cashflow ermittelt? Welche Bedeutung hat der Cashflow für die

Kreditwürdigkeit? Wie beeinflussen strategische Entscheidungen den Cashflow der Zukunft? Welche operativen Hebel helfen, den Cashflow zu verbessern? Welche Warnsignale sollten berücksichtigt werden? Das anwendungsorientierte Buch gibt Antworten, die anhand konkreter Cashflow-Rechnungen erläutert werden. Praxisbeispiele zeigen, wie gutes oder schlechtes Cashflow-Management über die Lebensfähigkeit von Unternehmen entscheiden. Mit Workshop zur Umsetzung eines effektiven Cashflow-Managements und Aufbau des dazugehörigen Cashflow-Cockpits im eigenen Unternehmen. **Luxury Tourism Market Trends, Changing Paradigms, and Best Practices** Springer Nature Over the past two decades, through unprecedented levels of prosperity and changing values, luxury tourism has transformed into a new consumption pattern. This book analyzes the topic in detail with contributions from both recognized scientists and prominent executives in the luxury business. It shows how the concept of luxury has shifted from material to immaterial dimensions, and outlines new trends that will shape the luxury market in the future. The content includes carefully selected leading examples from the most important segments of the tourism market, along with concrete recommendations and best practices. Sharing unique insights, the book is a must-read for those working in the tourism industry, as well as lecturers and university students of tourism. **Quantum Computation and Quantum Information** Cambridge University Press First-ever comprehensive introduction to the major new subject of quantum computing and quantum information. **A Holistic View of Software and Hardware Reuse Dependable Reuse of Components and Systems** Springer Nature This book focuses on software reuse and the chances, dependability tests and recommendations for best reuse practice. A short introduction of the Ecodesign of hardware is given combined with the latest update of relevant EU legislation and standardization. It also describes the combination of different states of software in a E&E system in order to guarantee dependability of the product to be resold. **The Sacred in Fantastic Fandom Essays on the Intersection of Religion and Pop Culture** McFarland To the casual observer, similarities between fan communities and religious believers are difficult to find. Religion is traditional, institutional, and serious; whereas fandom is contemporary, individualistic, and fun. Can the robes of nuns and priests be compared to cosplay outfits of Jedi Knights and anime characters? Can travelling to fan conventions be understood as pilgrimages to the shrines of saints? These new essays investigate fan activities connected to books, film, and online games, such as Harry Potter-themed weddings, using *The Hobbit* as a sacred text, and taking on heroic roles in *World of Warcraft*. Young Muslim women cosplayers are brought into conversation with Chaos magicians who use pop culture tropes and characters. A range of canonical texts, such as *Supernatural*, *Buffy the Vampire Slayer*, and *Sherlock*—are examined in terms of the pleasure and enchantment of repeated viewing. Popular culture is revealed to be a fertile source of religious and spiritual creativity in the contemporary world. **Handbuch Globale Klimapolitik** UTB Das als Durchbruch gefeierte Abkommen von Paris (2015) hat erneut bestätigt, dass es auf die Fähigkeit der Politik zur Zusammenarbeit ankommt, weltweit, national und in Netzwerken, wenn die Stabilisierung des Weltklimas gelingen soll. Das Handbuch informiert über die wichtigsten Institutionen (IPCC, UN-Klimaregime), Akteure (USA, EU, China, Entwicklungsländer) und Kooperationsformen des noch jungen globalen Politikfeldes. **Regulating Financial Derivatives Clearing and Central Counterparties** Edward Elgar Publishing This book puts forward a holistic approach to post-crisis derivatives regulation, providing insight into how new regulation has dealt with the risk that OTC derivatives pose to financial stability. It discusses the implications that post crisis regulation has had on central counterparties and the risk associated with clearing of OTC derivatives. The author offers a novel solution to tackle the potential negative externalities from the failure of a central counterparty and identifies potential new risks arising from post crisis reforms. **Social and Solidarity Economy Beyond the Fringe** Zed Books Ltd. As economic crises, growing inequality and climate change prompt a global debate on the meaning and trajectory of development, increasing attention is focusing on 'social and solidarity economy' as a distinctive approach to sustainable and rights-based development. While we are beginning to understand what social and solidarity economy is, what it promises and how it differs from 'business as usual', we know far less about whether it can really move beyond its fringe status in many countries and regions. Under what conditions can social and solidarity economy scale up and scale out - that is, expand in terms of the growth of social and solidarity economy organizations and enterprises, or spread horizontally within given territories? Bringing together leading researchers, blending theoretical and empirical analysis, and drawing on experiences and case studies from multiple countries and regions, this volume addresses these questions. In so doing, it aims to inform a broad constituency of development actors, including scholars, practitioners, activists and policy makers. **The Payment System Payments, Securities and Derivatives, and the Role of the Eurosystem** "This book is designed to provide the reader with an insight into the main concepts involved in the handling of payments, securities and derivatives and the organisation and functioning of the market infrastructure concerned. Emphasis is placed on the general principles governing the functioning of the relevant systems and processes and the presentation of the underlying economic, business, legal, institutional, organisational and policy issues. The book is aimed at decision-makers, practitioners, lawyers and academics wishing to acquire a deeper understanding of market infrastructure issues. It should also prove useful for students with an interest in monetary and financial issues."--Introduction (Pg. 20, para 8). **Collective Agency and Cooperation in Natural and Artificial Systems Explanation, Implementation and Simulation** Springer This book brings together philosophical approaches to cooperation and collective agency with research into human-machine interaction and cooperation from engineering, robotics, computer science and AI. Bringing these so far largely unrelated fields of study together leads to a better understanding of collective agency in natural and artificial systems and will help to improve the design and performance of hybrid systems involving human and artificial agents. Modeling collective agency with the help of computer simulations promises also philosophical insights into the emergence of collective agency. The volume consists of four sections. The first section is dedicated to the concept of agency. The second section of the book turns to human-machine cooperation. The focus of the third section is the transition from cooperation to collective agency. The last section concerns the explanatory value of social simulations of collective agency in the broader framework of cultural evolution.
