## STREET ART AND ACTIVISM IN THE GREATER CARIBBEAN

---

---

### IMPOSSIBLE STATES, VIRTUAL PUBLICS

---

Taylor & Francis **Foregrounding street art in the capital cities of Cuba, Haiti, and Puerto Rico, this book argues that Antillean street artists diagnose the "impossible state" of the arrested present (colonized, occupied, or under dictatorship) while simultaneously imagining liberated futures and fully sovereign states. Jana Evans Braziel launches a comparative study of art, politics, history, urban street cultures, engaged citizenships, and social transformations in**

three Antillean capital cities—Havana, Cuba; Port-au-Prince, Haiti; and San Juan, Puerto Rico—of the Greater Caribbean. The book includes a photo documentary archive of street art, murals, and installations by key muralists in these cities: Yulier Rodríguez Pérez, "Jerry" Rosembert Moïse, and Colectivo Moriviví (Chachi González Colón, Raysa Rodríguez García, and Salomé Cortés). Braziel offers art historical and geopolitical analyses of the urban street art in their cities of production, underscoring street art as political, economic, and environmental engagements (and not as exclusively aesthetic ones) with urban space and street life. The book will be of interest to scholars working in art history, Caribbean studies, Latin American studies, and urban studies.

## VISUALIZING RESEARCH

---

---

### A GUIDE TO THE RESEARCH PROCESS IN ART AND DESIGN

---

**Routledge** Visualizing Research guides postgraduate students in art and design through the development and implementation of a research project, using the metaphor of a 'journey of exploration'. For use with a formal programme of study, from masters to doctoral level, the book derives from the creative relationship between research, practice and teaching in art and design. It extends generic research processes into practice-based approaches more relevant to artists and designers, introducing wherever possible visual, interactive and collaborative methods. The Introduction and Chapter 1 'Planning the Journey' define the concept and value of 'practice-based' formal research, tracking the debate around its development and explaining key concepts and terminology. 'Mapping the Terrain' then describes methods of contextualizing research in art and design (the contextual review, using reference material); 'Locating Your Position' and 'Crossing the Terrain' guide the reader through the stages of identifying an appropriate research question and methodological approach, writing the proposal and managing research information. Methods of evaluation and analysis are explored, and of strategies for reporting and communicating research findings are suggested. Appendices and a glossary are also included. Visualizing Research draws on the experience of researchers in different contexts and includes case studies of real projects. Although written primarily for postgraduate students, research supervisors, managers and academic staff in art and design and related areas, such as architecture and media studies, will find this a valuable research reference. An accompanying website [www.visualizingresearch.info](http://www.visualizingresearch.info) includes multimedia and other resources that complement the book.

## ANARCHIST'S GUIDE TO HISTORIC HOUSE MUSEUMS

---

**Routledge** In these days of an aging traditional audience, shrinking attendance, tightened budgets, increased competition, and exponential growth in new types of communication methods, America's house museums need to take bold steps and expand their overall purpose beyond those of the traditional museum. They need not only to engage the communities surrounding them, but also to collaborate with visitors on the type and quality of experience they provide. This book is a groundbreaking manifesto that calls for the establishment of a more inclusive, visitor-centered paradigm based on the shared experience of human habitation. It draws inspiration from film, theater, public art, and urban design to transform historic house museums while providing a how-to guide for making historic house museums sustainable, through five primary themes: communicating with the surrounding community, engaging the community, re-imagining the visitor experience, celebrating the detritus of human habitation, and acknowledging the illusion of the shelter's authenticity. Anarchist's Guide to Historic House Museums offers a wry, but informed, rule-breaking perspective from authors with years of experience and gives numerous vivid examples of both good and not-so-good practices from house museums in the U.S.

### **ST. LOUIS JAZZ**

---

### **A HISTORY**

---

[Arcadia Publishing](#) Explore the history of the artists who contributed to the Gateway City's jazz scene and the world of music. In the early twentieth century, St. Louis was a hotbed for ragtime and blues, both roots of jazz music. In 1914, Jelly Roll Morton brought his music to the area. In 1919, Louis Armstrong came to town to play on the "floating conservatories" that plied the Mississippi. Miles Davis, the most famous of the city's jazz natives, changed the course of the genre four different times throughout a world-renowned career. The Black Artists Group of the 1970s was one of the first to bring world music practices into jazz. Author Dennis C. Owsley chronicles the ways both local and national St. Louis musicians have contributed to the city and to the world of music.

## **SUSTAINABLE NEIGHBOURHOODS IN AUSTRALIA**

---

### **CITY OF SYDNEY URBAN PLANNING**

---

[Springer](#) This book examines the planning and implementation of policies to create sustainable neighborhoods, using as a case study the City of Sydney. The authors ask whether many past planning and development practices were appropriate to the ways that communities then functioned, and what lessons we have learned. The aim is to illustrate the many variations within a city and from neighborhood to neighborhood regarding renewal (rehabilitation), redevelopment (replacement) and new development. Case study examples of nine City of Sydney neighborhoods note the different histories of planning and development in each. Features of the studies include literature searches, field work (with photography), and analysis. The authors propose a set of sustainability principles which incorporate

elements of the twenty seven principles of the 1992 Rio Declaration on Environment and Development Part One explores sustainable urban planning, and the importance of planning tools that enable best planning outcomes for communities and investors. Common factors in the nine case study neighborhoods are renewal, redevelopment and development pressures affecting Sydney from the 1970s to 2014. Also discussed are the differing circumstances of planning faced by authorities, developers and communities in each of the study areas. Part Two of the book is focused on the case study areas in City of Sydney East area: Woolloomooloo and Kings Cross. Part Three covers case study areas in Sydney's Inner South area: Chippendale, Redfern and Waterloo District. Part Four surveys the Inner West suburb of Erskineville. Part Five looks at the City West area, including the Haymarket District and the Pyrmont and Ultimo District. Part Six concentrates on the North West area suburb of Glebe. Part Seven of the book looks at the growth area of South Sydney District, which includes the suburbs of Beaconsfield, Zetland and the new localities of Victoria Park and Green Square. The authors recount lessons learned and outline directions of planning for sustainable neighborhoods. Finally, the authors challenge readers to apply the lessons of these case studies to further advances in sustainable urban planning.

Deftly combining writing on archives from different disciplines with artistic practices, the book clarifies the function and meaning of one of the most persistent artworld buzzwords of recent years, shedding light on the conceptual and historical implications of the so-called archival turn in contemporary art.

## **REGIONALISTS ON THE LEFT**

---

### **RADICAL VOICES FROM THE AMERICAN WEST**

---

University of Oklahoma Press **"Nothing is more anathema to a serious radical than regionalism," Berkeley English professor Henry Nash Smith asserted in 1980. Although regionalism in the American West has often been characterized as an inherently conservative, backward-looking force, regionalist impulses have in fact taken various forms throughout U.S. history. The essays collected in Regionalists on the Left uncover the tradition of left-leaning western regionalism during the 1930s and 1940s. Editor Michael C. Steiner has assembled a group of distinguished scholars who explore the lives and works of sixteen progressive western intellectuals, authors, and artists, ranging from nationally prominent figures such as John Steinbeck and Carey McWilliams to equally influential, though less well**

known, figures such as Angie Debo and Américo Paredes. Although they never constituted a unified movement complete with manifestos or specific goals, the thinkers and leaders examined in this volume raised voices of protest against racial, environmental, and working-class injustices during the Depression era that reverberate in the twenty-first century. Sharing a deep affection for their native and adopted places within the West, these individuals felt a strong sense of avoidable and remediable wrong done to the land and the people who lived upon it, motivating them to seek the root causes of social problems and demand change. *Regionalists on the Left* shows also that this radical regionalism in the West often took urban, working-class, and multicultural forms. Other books have dealt with western regionalism in general, but this volume is unique in its focus on left-leaning regionalists, including such lesser-known writers as B. A. Botkin, Carlos Bulosan, Sanora Babb, and Joe Jones. Tracing the relationship between politics and place across the West, *Regionalists on the Left* highlights a significant but neglected strain of western thought and expression.

## STRENGTHENING FORENSIC SCIENCE IN THE UNITED STATES

---

### A PATH FORWARD

---

[National Academies Press](#) Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

## THE ART TEACHER'S GUIDE TO EXPLORING ART AND DESIGN IN THE COMMUNITY

---

[Bloomsbury Publishing](#) How can community art build connection in diverse communities? Where is the art in contemporary libraries? How do you bring subway art into the classroom? Drawing on an abundance of examples from Finland, Italy, New Zealand, Spain and the USA, including the NYC 2nd Ave Subway, the Detroit's Heidelberg Project, the Favel Painting Foundation and bicycle rack sculpture, Szekely inspires readers to look beyond the classroom walls to develop meaningful art experiences for students. She shows the myriad art forms, media expressions, and design professions that have the influence and potential to shape the local environment, reaching far beyond the traditional museum and gallery venue. Underpinned by a clear philosophical foundation, the field-tested approaches show readers how to go beyond the study of reproductions or dwelling on of the masters who are framed in art museums, instead having meaningful art experiences using everyday objects and diverse collective experiences. She also shows that
