THE SURPRISING PURPOSE OF ANGER

BEYOND ANGER MANAGEMENT : FINDING THE GIFT

PuddleDancer Press You can feel it when it hits you. Your face flushes and your vision narrows. Your heartbeat increases as judgmental thoughts flood your mind. Your anger has been triggered, and you're about to say or do something that will likely make it worse. You have an alternative. By practicing the Nonviolent Communication (NVC) process you can use that anger to serve a specific, life-enriching purpose. It tells you that you're disconnected from what you value and that your needs are not being met. Rather than managing your anger by suppressing your feelings or blasting someone with your judgments, Marshall Rosenberg shows you how to use anger to discover what you need, and then how to meet your needs in constructive ways. This booklet will help you apply these four key truths: - People or events may spark your anger but your own judgments are its cause - Judging others as "wrong" prevents you from connecting with your unmet needs - Getting clear about your needs helps you identify solutions satisfying to everyone - Creating strategies focused on meeting your needs transforms anger into positive actions

THE LANGUAGE OF PEACE

COMMUNICATING TO CREATE HARMONY

IAP The Language of Peace: Communicating to Create Harmony offers practical insights for educators, students, researchers, peace activists, and all others interested in communication for peace. This book is a perfect text for courses in peace education, communications, media, culture, and other fields. Individuals concerned about violence, war, and peace will find this volume both crucial and informative. This book sheds light on peaceful versus destructive ways we use words, body language, and the language of visual images. Noted author and educator Rebecca L. Oxford guides us to use all these forms of language more positively and effectively, thereby generating greater possibilities for peace. Peace has many dimensions: inner, interpersonal, intergroup, international, intercultural, and ecological. The language of peace helps us resolve conflicts, avoid violence, and reduce bullying, misogyny, war, terrorism, genocide, circus journalism, political deception, cultural misunderstanding, and social and ecological injustice. Peace language, along with positive intention, enables us to find harmony inside ourselves and with people around us, attain greater peace in the wider world, and halt environmental destruction. This insightful book reveals why and how.

COMPASITO

MANUAL ON HUMAN RIGHTS EDUCATION FOR CHILDREN

Council of Europe Living among other people, in their families and communities, children become aware from a very early age of questions related to justice, and they search for the meaning of the world. By fostering an understanding of human rights, shaping opinion and developing attitudes, human rights education strongly supports this natural interest and learning process. This is what human rights education is about and this is what 'Compasito manual on human rights education for children' is for.'Compasito' is a starting point for educators, teachers and trainers who are ready to deal with human rights education with children of 7-13 years. The book covers the key concepts of human rights and children's rights, and provides substantial theoretical background to 13 key human rights issues, such as democracy, citizenship, gender equality, environment, media, poverty, and violence.The 42 practical activities serve to engage and motivate children to recognise human rights issues in their own environment. They help children to develop critical thinking, responsibility and a sense of justice, and help them learn how to take action to contribute to the betterment of their school or community. The manual also gives practical tips on how it can be used in various formal and non-formal educational settings.

PRAGMATICS OF HUMAN COMMUNICATION: A STUDY OF INTERACTIONAL PATTERNS, PATHOLOGIES AND PARADOXES

W. W. Norton & Company For the first time, a new generation of readers will have the opportunity to experience the ideas set forth in Pragmatics of Human Communication, a book that formed the foundation of much research into interpersonal communication in the latter portion of the 20th century. A new preface by Bill O'Hanlon puts Watzlawick's work in context for readers in this new paperback edition. Topics covered in this wide-ranging book include: the origins of communication; the idea that all behavior is communication; meta-communication; the properties of an open system; the family as a system of communication; the nature of paradox in psychotherapy; existentialism and human communication. After defining certain general concepts, the authors present basic characteristics of human communication and illustrate their manifestations and potential pathologies. Then the systemic aspects of human interactions that arise from the patterning of specific characteristics of communication are exemplified by the analysis of Albee's Who's Afraid of Virginia Woolf?

L'ALTRA ITALIA

EMIGRAZIONE STORICA E MOBILITÀ GIOVANILE A CONFRONTO

Edizioni Nuova Cultura Il volume analizza il fenomeno della mobilità giovanile usando la prospettiva della continuità con i flussi migratori storici. La nuova emigrazione è stata analizzata con gli sconcertanti numeri della partecipazione dei giovani alla vita produttiva italiana ma anche considerando un rinnovato quadro di riferimento sociologico che prevede un approccio diverso al viaggio, alla mobilità e una reinterpretazione del concetto stesso di nazionalità e geografia.

HOW TO ARGUE WITH A RACIST

HISTORY, SCIENCE, RACE AND REALITY

Hachette UK THE SUNDAY TIMES BESTSELLER 'Nobody deals with challenging subjects more interestingly and compellingly than Adam Rutherford, and this may be his best book yet. This is a seriously important work' BILL BRYSON 'A fascinating and timely refutation of the casual racism on the rise

around the world. The ultimate anti-racism guide for data-lovers everywhere' CAROLINE CRIADO PEREZ *** Race is real because we perceive it. Racism is real because we enact it. But the appeal to science to strengthen racist ideologies is on the rise - and increasingly part of the public discourse on politics, migration, education, sport and intelligence. Stereotypes and myths about race are expressed not just by overt racists, but also by well-intentioned people whose experience and cultural baggage steer them towards views that are not supported by the modern study of human genetics. Even some scientists are uncomfortable expressing opinions deriving from their research where it relates to race. Yet, if understood correctly, science and history can be powerful allies against racism, granting the clearest view of how people actually are, rather than how we judge them to be. HOW TO ARGUE WITH A RACIST is a vital manifesto for a twenty-first century understanding of human evolution and variation, and a timely weapon against the misuse of science to justify bigotry.

THE NEW AUTHORITY

FAMILY, SCHOOL, AND COMMUNITY

Cambridge University Press Haim Omer builds on his previous work to present a model of authority for parents, teachers and community workers that is suitable for today's free and pluralistic societies. This new authority contrasts with traditional authority in that it emphasizes self-control and persistence over control of the child, a network of support over a strict hierarchy, taking mutual responsibility for escalations over holding the child solely responsible, patience over threats, non-violent resistance over physical force, and transparency over secrecy. In addition to a thorough discussion of the underlying theory, The New Authority presents a practical program for families, schools and communities. Dr Omer provides specific instructions to combat violence and risky behavior at home and in school, increase parent and teacher interest and support, and implement interventions that increase safety, improve atmosphere and generate community cohesiveness.

COMPLEXITY PERSPECTIVES ON LANGUAGE, COMMUNICATION AND SOCIETY

Springer The "language-communication-society" triangle defies traditional scientific approaches. Rather, it is a phenomenon that calls for an integration of complex, transdisciplinary perspectives, if we are to make any progress in understanding how it works. The highly diverse agents in play are not merely cognitive and/or cultural, but also emotional and behavioural in their specificity. Indeed, the effort may require building a theoretical and methodological body of knowledge that can effectively convey the characteristic properties of phenomena in human terms. New complexity approaches allow us to rethink our limited and mechanistic images of human societies and create more appropriate emo-cognitive dynamic and holistic models. We have to enter into dialogue with the complexity views coming out of other more 'material' sciences, but we also need to take steps in the linguistic and psycho-sociological fields towards creating perspectives and concepts better fitted to human characteristics. Our understanding of complexity is different - but not opposed - to the one that is more commonly found in texts written by people working in physics or computer science, for example. The goal of this book is to extend the knowledge of these other more 'human' or socially oriented perspectives on complexity, taking account of the language and communication singularities of human agents in society. PARENTING IN CONTEMPORARY EUROPE

A POSITIVE APPROACH

Council of Europe This publication is an element of the Council of Europe's recent work in the field of positive parenting leading up To The Committee of Ministers' Recommendation Rec (2006) 19 on policy to support positive parenting. The authors review and analyse the major changes affecting parenting in Europe, arising from legal situations, research and practice. This work addresses the core issues related to positive parenting and non-violent upbringing, with particular emphasis on parents' entitlement to support from the state in carrying out their parental tasks. Five themes are focused upon: The legal situation And The results of research: what it means to be a parent according To The United Nations Convention on the Rights of the Child, The Council of Europe and new scientific knowledge; current thinking on the use of violence and corporal punishment against children; responses to family policy, especially in terms of support programs and services for parenting and families; the particular problems and needs of parents and children in situations of social exclusion; And The relationship between parenting and drug-related behavior among children and teenagers. The book also includes the text of the Recommendation Rec(2006)19, "Keys for parents" and "Guidelines for professionals.

INTRACTABLE CONFLICTS AND THEIR TRANSFORMATION

Syracuse University Press

THE EPZ CONFLICT OF INTERPRETATIONS

A&C Black Paul Ricoeur (1913-) is Professor Emeritus of Philosophy at the University of Chicago and Dean of the Faculty of Letters and Human Sciences at the University of Paris X, Nanterre. One of the foremost contemporary French philosophers, his work is influenced by Husserl, Marcel and Jaspers and is particularly concerned with symbolism, the creation of meaning and the interpretation of texts. The Conflict of Interpretations ranges across an astonishing diversity of fields: structuralism, linguistics, psychoanalysis, religion and faith. The essays it comprises are bound together by Ricoeur's customary concern for interpretation and language and all bear the stamp of the systematic and critical thinking which has become his hallmark in contemporary philosophy. THE ANTHROPOLOGICAL PARADOX

NICHES, MICRO-WORLDS AND PSYCHIC DISSOCIATION

Routledge This book addresses how the erosion of traditional forms of political association and legal regulation has given rise to a pluralism of "imperfect communities" constantly exposed to the risk of dissolution. These are niches and micro-worlds that are connected through precarious and ambivalent ties. Such a far-reaching transformation affects at one and the same time both our psychic and social identity. The book argues that this phenomenon is linked to the proliferation of new forms of psychic "disorder" - depression, personality disorder, dissociation - typical of hypermodern societies. However, while these can easily turn into genuine disorders, they can also open onto richer forms of identity, more complex than those of the past. Based on this analysis, the book's main claim is that this dynamic epitomizes a general anthropological paradox - one that has always marked the human animal: humans are bound by their own biological constitution to fend off disorder by drawing the boundaries of artificial niches, and yet they are inclined to expose themselves to unlimited contingency so that they can find a truly suitable environment. Pursuing a novel understanding of the apparent collapse of traditional juridico-political settings, this book makes the case that the emergence of dissociations at several levels - individual, social, political, legal - does not stem from a lack of political imagination. Rather, it is a situation with which humans are inevitably confronted: a perennial tension between the limited and the unlimited, between the desire to take refuge and the desire to cross borders.

A FORCE MORE POWERFUL

A CENTURY OF NON-VIOLENT CONFLICT

St. Martin's Press This nationally-acclaimed book shows how popular movements used nonviolent action to overthrow dictators, obstruct military invaders and secure human rights in country after country, over the past century. Peter Ackerman and Jack DuVall depict how nonviolent sanctions--such as protests, strikes and boycotts--separate brutal regimes from their means of control. They tell inside stories--how Danes outmaneuvered the Nazis, Solidarity defeated Polish communism, and mass action removed a Chilean dictator--and also how nonviolent power is changing the world today, from Burma to Serbia.

ECOLINGUISTICS

LANGUAGE, ECOLOGY AND THE STORIES WE LIVE BY

Routledge The increasingly rapid destruction of the ecological systems that support life is calling into question some of the fundamental stories that we live by: stories of unlimited economic growth, of consumerism, progress, individualism, success, and the human domination of nature. Ecolinguistics shows how linguistic analysis can help reveal the stories we live by, open them up to question, and contribute to the search for new stories. Bringing together the latest ecolinguistic studies with new theoretical insights and practical analyses, this book charts a new course for ecolinguistics as an engaged form of critical enquiry. Featuring: A framework for understanding the theory of ecolinguistics and applying it practically in real life; Exploration of diverse topics from consumerism in lifestyle magazines to Japanese nature haiku; A comprehensive glossary giving concise descriptions of the linguistic terms used in the book; Discourse analysis of a wide range of texts including newspapers, magazines, advertisements, films, nonfiction books, and visual images. This is essential reading for undergraduates, postgraduates and researchers working in the areas of Discourse Analysis and Language and Ecology.

THE VALUE OF LIFE

BIOLOGICAL DIVERSITY AND HUMAN SOCIETY

Island Press Debate on the threat to humanity posed by the massive and widespread loss of biological diversity has largely emphasized economic and ecological consequences. In *The Value of Life*, a leading social scientist adds a critical new dimension. Stephen R. Kellert explores the actual and perceived importance of biological diversity for humankind's physical, emotional, intellectual, and even spiritual well-being. Kellert identifies ten basic values, which he describes as biologically based, inherent human tendencies that are greatly influenced and moderated by culture, learning, and experience. Throughout, Kellert argues that the preservation of biodiversity is fundamentally linked to human well-being as he illustrates the importance of biological diversity to the human sociocultural and psychological condition. His discussion provides the reader with a deeper understanding of how humans depend on a vast matrix of affiliations with other living things to achieve lives rich in meaning and value.

BREAKING ROBERT'S RULES

THE NEW WAY TO RUN YOUR MEETING, BUILD CONSENSUS, AND GET RESULTS

This book outlines the five key steps toward consensus building, and addresses the specific problems that often get in the way of a group's progress.

STRATEGIC NONVIOLENT CONFLICT

THE DYNAMICS OF PEOPLE POWER IN THE TWENTIETH CENTURY

Greenwood Nonviolent action, well planned and implemented, is shown in this lucid, timely, and compelling work to effect dramatic outcomes against opponents utilizing violence. Ackerman and Kruegler recognize that not all nonviolent efforts meet with success, and they are careful to stress that a nonviolent approach involves great risks as well as opportunities. It is the effectiveness of the strategies employed which will determine whether or not those using nonviolent means can prevail against opponents who rely on violence in pursuit of objectives. Twelve strategic principles are established in this book which serve as a conceptual foundation to enhance the prospects of success in nonviolent campaigns. The authors also develop six twentieth-century examples of nonviolent action from the early Russian Revolution of 1904-1906 through the Solidarity movement in 1980-1981. Each campaign narrative constitutes a fascinating reading experience and illustrates common themes, strategies, and important aspects of behavior on the part of major participants in nonviolent encounters. This is a singularly important book. It offers more than a mere plea for nonviolence. Ackerman and Kruegler introduce their work by noting the surprising extent to which nonviolent sanctions are currently employed to pressure adversaries in the international political arena. They go on to provide hard lessons based on important, and often painful, historical efforts; principles to govern the choice and implementation of strategies when nonviolent action is the determined response; and insightful analysis to guide assessment and policy. A work which will focus analysis, inform decision-making, stimulate policy consideration, and invigorate research, this volume will well serve professionals and students in international relations and numerous related fields.

IRULES

WHAT EVERY TECH-HEALTHY FAMILY NEEDS TO KNOW ABOUT SELFIES, SEXTING, GAMING, AND GROWING UP

Rodale Books As Janell Burley Hofmann, mother of five, wrapped her 13-year-old's iPhone on Christmas Eve, she was overwhelmed by questions: "Will my children learn to sit and wonder without Googling? Should I know their passwords for online accounts? Will they experience the value of personal connection without technology?" To address her concerns, she outlined boundaries and expectations in a contract for her son to sign upon receiving his first cell phone. When Hofmann's editor at *The Huffington Post* posted the contract, now known as *iRules*, it resonated on a massive scale and went viral, resulting in a tsunami of media coverage and requests. It quickly became apparent that people across the country were hungry for more. In *iRules*, Hofmann provides families with the tools they need to find a balance between technology and human interaction through a philosophy she calls *Slow Tech Parenting*. In the book, she educates parents about the online culture tweens and teens enter the minute they go online, exploring issues like cyberbullying, friend fail, and sexting, as well as helping parents create their own *iRules* contracts to fit their families' needs. As funny and readable as it is prescriptive, *iRules* will help parents figure out when to unplug and how to stay in sync with the changing world of technology, while teaching their children self-respect, integrity, and responsibility.

BRAVE NEW WORLD REVISITED

A NOVEL

Harper Collins When Aldous Huxley wrote his famous novel *Brave New World*, he did so with the sincere belief that the dystopian world he created was a true possibility given the direction of the social, political and economic world order. Written almost thirty years later, *Brave New World Revisited* is a re-evaluation of his predictions based on the changes he had witnessed in the meantime. In this twelve-part essay, Huxley argues that society is moving toward his dystopian vision even faster than he had originally assumed, and provides his own suggestions on how to bring an end to this decadent decline. *Brave New World Revisited* condemns symptoms of modern life such as overpopulation, propaganda and extreme government control while providing a staunch defence of individualism. Despite being published over fifty years ago, the problems identified in *Brave New World Revisited* are still startlingly relevant, lending a chilling credibility to Aldous Huxley's unsettling predictions. HarperTorch brings great works of non-fiction and the dramatic arts to life in digital format, upholding the highest standards in ebook production and celebrating reading in all its forms. LOSER

Harper Collins From renowned Newbery-winning author Jerry Spinelli comes a powerful story about how not fitting in just might lead to an incredible life. This classic book is perfect for fans of Gordon Korman and Carl Hiaasen. Just like other kids, Zinkoff rides his bike, hopes for snow days, and wants to be like his dad when he grows up. But Zinkoff also raises his hand with all the wrong answers, trips over his own feet, and falls down with laughter over a word like "jabip." Other kids have their own word to describe him, but Zinkoff is too busy to hear it. He doesn't know he's not like everyone else. And one winter night, Zinkoff's differences show that any name can someday become "hero." With some of his finest writing to date and great wit and humor, Jerry Spinelli creates a story about a boy's individuality surpassing the need to fit in and the genuine importance of failure. As readers follow Zinkoff from first through sixth grade, it becomes impossible not to identify with and root for him through failures and triumphs. The perfect classroom read.

POST-DEMOCRACY

Polity Post-Democracy is a polemical work that goes beyond current complaints about the failings of our democracy and explores the deeper social and economic forces that account for the current malaise. Colin Crouch argues that the decline of those social classes which had made possible an active and critical mass politics has combined with the rise of global capitalism to produce a self-referential political class more concerned with forging links with wealthy business interests than with pursuing political programmes which meet the concerns of ordinary people. He shows how, in some respects, politics at the dawn of the twenty-first century returns us to a world familiar well before the start of the twentieth, when politics was a game played among elites. However, Crouch maintains that the experience of the twentieth century remains salient and it reminds us of possibilities for the revival of politics. This engaging book will prove challenging to all those who claim that advanced societies have reached a virtual best of all possible democratic worlds, and will be compelling reading for anyone interested in the shape of twenty-first-century politics.

THE POLITICS OF NONVIOLENT ACTION

Boston : P. Sargent Publisher

THE TABLET OF DESTINIES

Penguin UK A beguiling new reimagining of one of the most ancient and mysterious origin myths of human civilization 'The Flood didn't come suddenly as a big surprise. It came at the end of a long, tormented story. Men just went on multiplying and the noise they made was ever more irksome . . . I remember days of desperation.' A long time ago, the gods grew tired of humans and decided to send a flood to destroy them. But Ea, the god of fresh underground water, didn't agree. He advised one of his devotees, Utnapishtim, to build a quadrangular boat to house humans and animals, and saved these living creatures from the Flood. Rather than punish Utnapishtim for his disobedience, Enlil, King of the gods, granted the mortal eternal life and banished him to the island of Dilmun. Thousands of years later, when Sinbad the Sailor is shipwrecked and arrives on that very same island, the two begin a conversation about courage, loss, salvation and sacrifice. Following Calasso's masterful retelling of ancient Greek myths in *The Marriage of Cadmus and Harmony* and Indic myths in *Ka*, this richly imaginative work delves into the crucible of our collective consciousness to reimagine the origin stories of one of the earliest human civilizations.
