Not for Happiness

A Guide to the So-Called Preliminary Practices

Shambhala Publications Do you practise meditation because you want to feel good? Or to help you relax and be "happy"? Then frankly, according to Dzongsar Jamyang Khyentse, you are far better off having a full-body massage than trying to practise the Dharma. Genuine spiritual practice, not least the Ngöndro preliminaries, will not bring the kind of comfort and ease most worldly people crave. Quite the opposite, in fact. But if your ultimate goal is enlightenment, Ngöndro practice is a must, and Not for Happiness your perfect guide, as it contains everything an aspiring practitioner needs to get started, including advice about: • developing "renunciation mind" • discipline, meditation and wisdom • using your imagination in visualization practice • why you need a guru

Practitioner's Guide to Using Research for Evidence-Based Practice

John Wiley & Sons Praise for the previous edition "An extraordinary and important book. Its approach to evidence-based practice (EBP) is very sound, realistic, and generous to the complexities of everyday practice. Reading and using this book is a must." —Haluk Soydan, PhD, School of Social Work, University of Southern California "This book has the potential to change practice in the helping professions. Rather than focusing on how to conduct research, Practitioner's Guide to Using Research for Evidence-Based Practice instead shows readers how to understand the literature.... [The] generous use of humor and the inclusion of simple, practice-relevant examples make this book a pleasure to read." —Aron Shlonsky, PhD, Faculty of Social Work, University of Toronto "I particularly like the integration of research methods and EBP; this is the book's major innovation in my mind as it allows readers to see the connections between research and practice. [The book] also succeeds by taking very complex EBP principles and explaining them in practical terms." —Jeffrey M. Jenson, PhD, Graduate School of Social Work, University of Denver Hands-on guidance for research-informed practice and practice-informed research Now in a second edition, Practitioner's Guide to Using Research for Evidence-Based Practice offers a clinician-oriented approach to appraising and using research as part of the EBP process. This accessible guide presents essential and practical guidance on how to integrate research appraisal into EBP endeavors to determine which interventions, policies, and assessment tools are supported by the best evidence. It introduces: Increased attention to macro-level EBP questions and studies New discussion on defining EBP, including the addition of a transdisciplinary model of EBP More detailed guidance on EBP question formulation and conducting Internet searches, including the PICO framework New content on multivariate designs, including propensity score matching, and on mixed-model and mixed-methods studies

Guide to International Anti-Dumping Practice

Kluwer Law International B.V. This book is the first to bring together the actual practices and procedures in all the major users of anti-dumping. The countries surveyed include all the so-called 'traditional' users (Australia, Canada, the EU, New Zealand, South Africa, and the United States) as well as the leading 'new' users (Argentina, Brazil, China, India, Korea, Mexico, and Turkey). The book provides not only an overview of each of the systems considered but also a detailed reference to the way different jurisdictions have handled specific issues. In addition, the structure for each chapter is virtually identical, allowing for a ready comparative analysis of various topics. These topics include the following: ; applicable legislation, regulations, prescribed guidelines and procedures; decision-making process and time-line; the likelihood of an investigation leading to the imposition of measures; statistics 1995-2011 with details of actual investigations and duties imposed; threshold of injury and calculation of non-injurious price; establishment of causal link; verification reports, hearings, access to information, and other procedural issues; reviews and refunds; and anti-circumvention measures. An introductory chapter provides a comparative statistical analysis of the use of anti-dumping by the thirteen countries, highlighting key features of anti-dumping systems in a comparative way. The introduction also assesses the important impacts of China's accession to the WTO in 2001 and of the economic and financial crisis of 2008-2009, discusses the treatment of non-market economies, and notes emerging tendencies in anti-dumping reform. This is an invaluable work on a key area in trade (and competition) law, written by a team of well-known experts. With its comprehensive and practical format, the book will be of great interest to practitioners dealing with anti-dumping cases, including trade law practitioners who may have to defend anti-dumping cases in different jurisdictions, attorneys in international trade law and competition law, government officials, academics, and researchers.
