KEY=CITIES - HALLIE ZAYNE

REINVENTING CITIES

EQUITY PLANNERS TELL THEIR STORIES

Temple University Press *Interviews with planners devoted to the needs of the poor and working class.*

REINVENTING CITIES

EQUITY PLANNERS TELL THEIR STORIES

Temple University Press *Reinventing Cities* emphasizes the extraordinary accomplishments of eleven urban planners who work for the needs of low income and working class people. Through the voices of equity planners who have worked "in the trenches" of city halls, Norman Krumholz and Pierre Clavel explore the inner dimensions of social change, economic development, community organizing, and the dynamics of implementing and producing fair housing. Preceded by "snapshots" that describe the demographics, politics, and economics of each specific city or region, the editors' interviews with these leading progressive planners highlight productive strategies, disquieting failures, and the cities in which the fought for equity. Included are conversations with Rick Cohen, former director of Jersey City's Department of Housing and Economic Development; Dale F. Bertsch, former first director of the Miami Valley Regional Planning Commission, Dayton, Ohio; Robert Mier, former commissioner of the Department of Economic Development (DED); Kari J. Moe, former deputy commissioner of Research and Development, DED; Arturo Vazquez, former director of Mayor Washington's Office of Employment and Training, Chicago; Margaret D. Strachan, former city commissioner, Portland, Oregon; Peter Dreier, former housing director, Boston Redevelopment Authority, and policy aide to Mayor Raymond Flynn; Billie Bramhall, planning staff, Mayor Federico Pena, Denver, Colorado; Howard Stanback, city manager, Hartford, Connecticut; Derek Shearer, former Planning Commission chairman, Santa Monica, California; and Kenneth Grimes, senior planning analyst, San Diego Housing Commission. Author note: A former planning director of Cleveland, Ohio, and past president of the American Planning Association, Norman Krumholz is Professor of Urban Planning at Cleveland State University and the co-author (with John Forester) of *Making Equity Planning Work: Leadership in the Public Sector* (Temple). Pierre Clavel, Professor of City and Regional Planning at Cornell University, is the author of *The Progressive City and Opposition Planning in Wales and Appalachia* (Temple).

THE CITY READER

Psychology Press *This third edition juxtaposes the very best publications on the city. It reflects the latest thinking on globalization, information technology and urban theory. It is a comprehensive mapping of the terrain of urban studies: old and new.*

ADVANCING EQUITY PLANNING NOW

Cornell University Press *What can planners do to restore equity to their craft? Drawing upon the perspectives of a diverse group of planning experts, Advancing Equity Planning Now places the concepts of fairness and equal access squarely in the center of planning research and practice. Editors Norman Krumholz and Kathryn Wertheim Hexter provide essential resources for city leaders and planners, as well as for students and others, interested in shaping the built environment for a more just world. Advancing Equity Planning Now remind us that equity has always been an integral consideration in the planning profession. The historic roots of that ethical commitment go back more than a century. Yet a trend of growing inequality in America, as well as other recent socio-economic changes that divide the wealthiest from the middle and working classes, challenge the notion that a rising economic tide lifts all boats. When planning becomes mere place-making for elites, urban and regional planners need to return to the fundamentals of their profession. Although they have not always done so, planners are well-positioned to advocate for greater equity in public policies that address the multiple objectives of urban planning including housing, transportation, economic development, and the removal of noxious land uses in neighborhoods. Thanks to generous funding from Cleveland State University, the ebook editions of this book are available as Open Access volumes from Cornell Open (cornellopen.org) and other repositories.*

PLANNING AND URBAN DESIGN STANDARDS

John Wiley & Sons *From the publishers of Architectural Graphic Standards, this book, created under the auspices of The American Planning Association, is the most comprehensive reference book on urban planning, design, and development available today. Contributions from more than two hundred renowned professionals provide rules of thumb and best practices for mitigating such environmental impacts as noise, traffic, aesthetics, preservation of green space and wildlife, water quality, and more. You get in-depth information on the tools and techniques used to achieve planning and design outcomes, including economic analysis, mapping, visualization, legal foundations, and real estate developments. Thousands of illustrations, examples of custom work by today's leading planners, and insider information make this work the new standard in the field. Order your copy today.*

PLANNING IN THE USA

POLICIES, ISSUES AND PROCESSES

Routledge *Planning in the USA is a comprehensive introduction to the policies, theory and practice of planning. Outlining land use, urban planning and environmental protection policies, this fully illustrated book explains the nature of the planning process and the way in which policy issues are identified, defined and approached. Offering a detailed account of urbanization in the USA, Barry Cullingworth reveals the problematic nature and limitations of the planning process, the fallibility of experts, and difficulties facing policy-makers in their search for solutions. Coverage includes: * Land Use Regulation * Transport, Housing and Community Development * Public Attitudes to Planning * Property Rights * Environmental Planning and Policies * Growth Management * Planning and Governance Barry Cullingworth's Planning in the USA is an essential book for students and planners and all who are concerned with the nature of contemporary urban and environmental problems.*

ECONOMIC DEVELOPMENT IN AMERICAN CITIES

THE PURSUIT OF AN EQUITY AGENDA

State University of New York Press *Evaluates the impact of equity investments in five cities during the 1990s.*

PLANNERS IN POLITICS

DO THEY MAKE A DIFFERENCE?

Edward Elgar Publishing *In this innovative book, ten executive politicians with backgrounds in planning from around the world dissect their own political careers. Reflecting on the often structural impact of their work in political decision-making, they also consider the translation of their experiences back into academic life or professional practice.*

CLEVELAND

A METROPOLITAN READER

Kent State University Press *An analysis of the political economy, social development and history of Cleveland from 1796 to the present. As one of the oldest communities in the United States, the author looks at it as a model of transformation for other industrial cities.*

READINGS IN PLANNING THEORY

John Wiley & Sons *Featuring updates and revisions to reflect rapid changes in an increasingly globalized world, Readings in Planning Theory remains the definitive resource for the latest theoretical and practical debates within the field of planning theory. Represents the newest edition of the leading text in planning theory that brings together the essential classic and cutting-edge readings Features 20 completely new readings (out of 28 total) for the fourth edition Introduces and defines key debates in planning theory with editorial materials and readings selected both for their accessibility and importance Systematically captures the breadth and diversity of planning theory and puts issues into wider social and political contexts without assuming prior knowledge of the field*

PLANNING IN THE USA

POLICIES, ISSUES, AND PROCESSES

Psychology Press *Planning in the USA is a comprehensive introduction to the policies, theory and practice of planning. Outlining land use, urban planning and environmental protection policies, this fully illustrated book explains the nature of the planning process and the way in which policy issues are identified, defined and approached. Offering a detailed account of urbanization in the USA, Barry Cullingworth reveals the problematic nature and limitations of the planning process, the fallibility of experts, and difficulties facing policy-makers in their search for solutions. Coverage includes: * Land Use Regulation * Transport, Housing and Community Development * Public Attitudes to Planning * Property Rights * Environmental Planning and Policies * Growth Management * Planning and Governance Barry Cullingworth's Planning in the USA is an essential book for students and planners and all who are concerned with the nature of contemporary urban and environmental problems.*

PROFESSION OF CITY PLANNING, THE

Transaction Publishers *In thirty-four provocative and insightful chapters, the nation's leading planners present a definitive assessment of fifty years of city planning and establish a benchmark for the profession for the next fifty years. The book appraises what planners do and how well they do it, how and why their current activities differ from past practices, and how much and in what ways planners have or have not enhanced the quality of urban life and contributed to the intellectual capital of the field. How have the goals, values, and practices of planners changed? What do planners say about their roles and the problems they confront? What is the relevance of their skills, from design capabilities and environmental savvy to intermediate and long-term perspectives and the pragmatics of implementation? The contributors seeking to answer these questions include Anthony Downs, Nathan Glazer, Philip B. Herr, Judith E. Innes, Terry S. Szold, Lawrence J. Vale, and Sam Bass Warner, Jr. The Profession of City Planning contrasts with the main changes in the US over the second half of the twentieth century in city planning. Sector images of the practice and effects of planning on housing, transportation, and the environment, as well as the development of economic tools are also discussed.*

PLANNING IN THE USA

POLICIES, ISSUES, AND PROCESSES

Routledge *This extensively revised and expanded third edition of Planning in the USA continues to provide a comprehensive introduction to the policies, theory and practice of planning. Discussing land use, urban planning and environmental protection policies, this fully illustrated book explains the nature of the planning process and the way in which policy issues are identified, defined and approached. New planning legislation and regulations at the state and federal layers of government are exemplified alongside examples of local ordinances in a variety of planning areas. New material includes: a new chapter on the Comprehensive Plan a new chapter on the use of technology in planning a discussion on planning in New Orleans after Katrina the implications and aftermath of Kelo v. New London a discussion on the Kyoto Protocol and Global Warming a discussion on form-based codes, performance zoning an enhanced discussion of financing urban development, including General Obligation Bonds and Revenue Bonds the implications of Oregon's Measure 37 a discussion on congestion charging a discussion on wetlands a discussion of Big-Box stores and aesthetics a discussion on the Main Street Program and Business Improvement Districts. The text features numerous boxed case studies, illustrations, and photographs. This book offers a thoroughly detailed account of urbanization in the United States and reveals the problematic nature and limitations of the planning process, the fallibility of experts and the difficulties facing policy makers in their search for solutions. Planning in the USA is an essential book for students, planners and all who are concerned with the nature of contemporary urban and environmental problems. Both comprehensive and easily accessible this extensively revised third edition will be an invaluable resource for all students of planning and urban related research.*

REVIVING CRITICAL PLANNING THEORY

DEALING WITH PRESSURE, NEO-LIBERALISM, AND RESPONSIBILITY IN COMMUNICATIVE PLANNING

Routledge *Discussing some of the most vexing criticism of communicative planning theory (CPT), this book goes on to suggest how theorists and planners can respond to it. Looking at issues of power, politics and ethics in relation to planning, this book is for both critics and advocates of CPT, with lessons for all. With severe criticisms being raised against CPT, the need has arisen to systematically think through what responsibilities planning theorists might have for the end-uses of their theoretical work. Offering inventive proposals for amending the shortcomings of this widely adhered planning method, this book reflects on what communicative planning theorists and practitioners can and should do differently.*

ENCYCLOPEDIA OF THE CITY

Taylor & Francis *The "Encyclopedia of the City" complements Routledge's strong list of readers and textbooks in urban studies and the city. Focusing on the key topics encountered by undergraduates and scholars in urban studies and allied fields, the contributions of its major theoreticians and practitioners, and on other individuals, groups, and organizations which study the city or practice in a field that directly or indirectly affects the city, the "Encyclopedia" necessarily adopts an interdisciplinary and multidisciplinary perspective. A first-class work of reference that will be both an essential resource for independent study as well as a useful aid in teaching, this is a solid but also provocative starting point for wider exploration of the citizenship; city; city beautiful movement; City of Ur; city typologies; civil rights movement; civil society; classicism; closed circuit television*

SOCIAL CAPITAL IN DEVELOPMENT PLANNING

LINKING THE ACTORS

Springer *The pursuit of sustainable development and smart growth is a main challenge today in countries around the world. Social capital is an asset of their territorial communities. It is also a precondition for national and local policies that aim to better the economic base and quality of life for all. This change is socially diffused, economically sustainable over time, and smart in its content. A significant stock of social capital facilitates such results because it links into the process of development planning institutional decision makers and socioeconomic stakeholders who share trust, solidarity norms, and a community vision. In the last thirty years, social capital has become a forceful concept in the social sciences, the subject of many scholarly works and a topic of keen interest and debate in policy circles. Yet the main focus has been on defining and measuring social capital, with little attention given to its value in promoting development policies. Social Capital in Development Planning updates and advances the debate on social capital through the analysis of the application of the concept of social capital to programs for sustainable and smart socioeconomic development; empirical findings; and a new paradigm for development planning.*

A COMPANION TO THE CITY

John Wiley & Sons *A Companion to the City provides the reader with an indispensable and authoritative overview of the key debates, controversies, and questions concerning the city from a variety of theoretical vantage points with an international perspective. Indispensable companion for students of the City. Multidisciplinary approach of interest across several fields. Includes contributions from major scholars in the field.*

SEARCHING FOR THE JUST CITY

DEBATES IN URBAN THEORY AND PRACTICE

Routledge *Cities are many things. Among their least appealing aspects, cities are frequently characterized by concentrations of insecurity and exploitation. Cities have also long represented promises of opportunity and liberation. Public decision-making in contemporary cities is full of conflict, and principles of justice are rarely the explicit basis for the resolution of disputes. If today's cities are full of injustices and unrealized promises, how would a Just City function? Is a Just City merely a utopia, or does it have practical relevance? This book engages with the growing debate around these questions. The notion of the Just City emerges from philosophical discussions about what justice is combined with the intellectual history of utopias and ideal cities. The contributors to this volume, including Susan Fainstein, David Harvey and Margit Mayer articulate a conception of the Just City and then examine it from differing angles, ranging from Marxist thought to communicative theory. The arguments both develop the concept of a Just City and question it, as well as suggesting alternatives for future expansion. Explorations of the concept in practice include case studies primarily from U.S. cities, but also from Europe, the Middle East and Latin America. The authors find that a forthright call for justice in all aspects of city life, putting the question of what a Just City should be on the agenda of urban reform, can be a practical approach to solving questions of urban policy. This synthesis is provocative in a globalised world and the contributing authors bridge the gap between theoretical conceptualizations of urban justice and the reality of planning and building cities. The notion of the Just City is an empowering framework for contemporary urban actors to improve the quality of urban life and Searching for the Just City is a seminal read for practitioners, professionals, students, researchers and anyone interested in what urban futures should aim to achieve.*

REDEVELOPMENT AND RACE

PLANNING A FINER CITY IN POSTWAR DETROIT

Wayne State University Press *In the decades following World War II, professional city planners in Detroit made a concerted effort to halt the city's physical and economic decline. Their successes included an award-winning master plan, a number of laudable redevelopment projects, and exemplary planning leadership in the city and the nation. Yet despite their efforts, Detroit was rapidly transforming into a notorious symbol of urban decay. In Redevelopment and Race: Planning a Finer City in Postwar Detroit, June Manning Thomas takes a look at what went wrong, demonstrating how and why government programs were ineffective and even destructive to community needs. In confronting issues like housing shortages, blight in older areas, and changing economic conditions, Detroit's city planners worked during the urban renewal era without much consideration for low-income and African American residents, and their efforts to stabilize racially mixed neighborhoods faltered as well. Steady declines in industrial prowess and the constant decentralization of white residents counteracted planners' efforts to rebuild the city. Among the issues Thomas discusses in this volume are the harmful impacts of Detroit's highways, the mixed record of urban renewal projects like Lafayette Park, the effects of the 1967 riots on Detroit's ability to plan, the city-building strategies of Coleman Young (the city's first black mayor) and his mayoral successors, and the evolution of Detroit's federally designated Empowerment Zone. Examining the city she knew first as an undergraduate student at Michigan State University and later as a scholar and planner, Thomas ultimately argues for a different approach to traditional planning that places social justice, equity, and community ahead of purely physical and economic objectives. Redevelopment and Race was originally published in 1997 and was given the Paul Davidoff Award from the Association of Collegiate Schools of Planning in 1999. Students and teachers of urban planning will be grateful for this re-release. A new postscript offers insights into changes since 1997.*

PLANNING IDEAS THAT MATTER

LIVABILITY, TERRITORIALITY, GOVERNANCE, AND REFLECTIVE PRACTICE

MIT Press *Leading theorists and practitioners trace the evolution of key ideas in urban and regional planning over the last hundred years Over the past hundred years of urbanization and suburbanization, four key themes have shaped urban and regional planning in both theory and practice: livability, territoriality, governance, and reflective professional practice. Planning Ideas That Matter charts the trajectories of these powerful planning ideas in an increasingly interconnected world. The contributors, leading theorists and practitioners, discuss livability in terms of such issues as urban density, land use, and the relationship between the built environment and natural systems; examine levels of territorial organization, drawing on literature on regionalism, metropolitanism, and territorial competition; describe the ways planning connects to policy making and implementation in a variety of political contexts; and consider how planners conceive of their work and learn from practice. Throughout, the emphasis is on how individuals and institutions—including government, business, professional organizations, and universities—have framed planning problems and ideas. The focus is less on techniques and programs than on the underlying concepts that have animated professional discourse over the years. The book is recommended for classroom use, as a reference for scholars and practitioners, and as a history of planning for those interested in the development of the field.*

POLICY, PLANNING, AND PEOPLE

PROMOTING JUSTICE IN URBAN DEVELOPMENT

University of Pennsylvania Press *The contributors of Policy, Planning, and People argue for the promotion of social equity and quality of life by designing and evaluating urban policies and plans. Edited by Naomi Carmon and Susan S. Fainstein, the volume features original essays by leading authorities in the field of urban planning and policy, mainly from the United States, but also from Canada, Hungary, Italy, and Israel. The contributors discuss goal setting and ethics in planning, illuminate paradigm shifts, make policy recommendations, and arrive at best practices for future planning. Policy, Planning, and People includes theoretical as well as practice-based essays on a wide range of planning issues: housing and neighborhood, transportation, surveillance and safety, the network society, regional development and community development. Several essays are devoted to disadvantaged and excluded groups such as senior citizens, the poor, and migrant workers. The unifying themes of this volume are the values of equity, diversity, and democratic participation. The contributors discuss and draw conclusions related to the planning process and its outcomes. They demonstrate the need to look beyond efficiency to determine who benefits from urban policies and plans. Contributors: Alberta Andreotti, Tridib Banerjee, Rachel G. Bratt, Naomi Carmon, Karen Chapple, Norman Fainstein, Susan Fainstein, Eran Feitelson, Amnon Frenkel, George Galster, Penny Gurstein, Deborah Howe, Norman Krumholz, Jonathan Levine, Anastasia Loukaitou-Sideris, Enzo Mingione, Kenneth Reardon, Izhak Schnell, Daniel Shefer, Michael Teitz, Iván Tosics, Lawrence Vale, Martin Wachs.*

URBAN PLANNING IN A MULTICULTURAL SOCIETY

Greenwood Publishing Group *Reveals why previous community planning practices have failed and suggests that improvements can be made by taking into consideration the diverse needs of a multicultural society.*

THE OXFORD HANDBOOK OF URBAN PLANNING

Oxford University Press The Oxford Handbook of Urban Planning is an authoritative volume on planning, a long-established professional social science discipline in the U.S. and throughout the world. Edited by Rachel Weber and Randall Crane, professors at two leading planning institutes in the United States, this handbook collects together over 45 noted field experts to discuss three key questions: Why plan? How and what do we plan? Who plans for whom? These three questions are then applied across three major topics in planning: States, Markets, and the Provision of Social Goods; The Methods and Substance of Planning; and Agency, Implementation, and Decision Making. Covering the key components of the discipline, this book is a comprehensive, discipline-defining text suited for students and seasoned planners alike.

DIALOGUES IN URBAN AND REGIONAL PLANNING

1

Psychology Press Dialogues in Urban and Regional Planning offers a selection of the best urban planning scholarship from each of the world's planning scholarship communities. The papers presented illustrate the concerns and the discourse of planning scholarship communities and provide a glimpse into planning theory and practice by planning academics around the world. Readers will find this collection valuable in opening new avenues for exploration. This book has been put together by the Global Planning Education Association Network (GPEAN). The nine member associations of GPEAN are: the Association of African Planning Schools (AAPS), the Association of Collegiate Schools of Planning (ACSP) in USA, the Association of Canadian University Planning Programs (ACUPP), the Association of European Schools of Planning (AESOP), the Association of Latin American Schools of Urban Planning (ALEUP), the National Association of Urban and Regional Post graduate and Research Programs (ANPUR) in Brazil, the Australia and New Zealand Association of Planning Schools (ANZAPS), the Association for the Development of Planning Education and Research (APERAU), and the Asian Planning Schools Association (APSA).

COMMUNITY ACTION AND PLANNING

CONTEXTS, DRIVERS AND OUTCOMES

Policy Press Analyses the contexts, drivers and outcomes of community action and planning in the global north: from emergent neighbourhood planning in England to the community-based housing movement in New York, and from active citizenship in the Dutch new towns to associative action in Marseille.

THE OXFORD HANDBOOK OF URBAN ECONOMICS AND PLANNING

Oxford University Press This volume embodies a problem-driven and theoretically informed approach to bridging frontier research in urban economics and urban/regional planning. The authors focus on the interface between these two subdisciplines that have historically had an uneasy relationship. Although economists were among the early contributors to the literature on urban planning, many economists have been dismissive of a discipline whose leading scholars frequently favor regulations over market institutions, equity over efficiency, and normative prescriptions over positive analysis. Planners, meanwhile, even as they draw upon economic principles, often view the work of economists as abstract, not sensitive to institutional contexts, and communicated in a formal language spoken by few with decision making authority. Not surprisingly, papers in the leading economic journals rarely cite clearly pertinent papers in planning journals, and vice versa. Despite the historical divergence in perspectives and methods, urban economics and urban planning share an intense interest in many topic areas: the nature of cities, the prosperity of urban economies, the efficient provision of urban services, efficient systems of transportation, and the proper allocation of land between urban and environmental uses. In bridging this gap, the book highlights the best scholarship in planning and economics that address the most pressing urban problems of our day and stimulates further dialog between scholars in urban planning and urban economics.

DIALOGUES IN URBAN AND REGIONAL PLANNING

Routledge This is the third book in the series offering a new selection of the best urban planning scholarship from each of the world's planning school associations. The award winning papers presented illustrate the concerns and the discourse of planning scholarship communities and provide a glimpse into planning theory and practice by planning academics around the world. All those with an interest in urban and regional planning will find this collection valuable in opening new avenues for research and debate.

CIVIC INNOVATION IN AMERICA

COMMUNITY EMPOWERMENT, PUBLIC POLICY, AND THE MOVEMENT FOR CIVIC RENEWAL

Univ of California Press In this book, two leading experts on community action provide the first scholarly examination of the civic renewal movement that has emerged in the United States in recent decades. Sirianni Friedland examine civic innovation since the 1960s as social learning in four arenas (community organizing/development, civic environmentalism, community health, and public journalism), and they link local efforts to broader networks and to the development of "public policy for democracy." They also explore the emergence of a movement for civic renewal that builds upon the civic movements in these four arenas. In contrast to some recent studies that stress broad indicators of civic decline, this study analyzes innovation as a long process of social learning within specific institutional and policy domains with complex challenges and cross-currents. It draws upon analytical frameworks of social capital, policy learning, organizational learning, regulatory culture, democratic theory, and social movement theory. The study is based upon interviews with more than 400 innovative practitioners, as well as extensive field observation, case study, action research, and historical analysis.

SPATIAL PLANNING AND URBAN DEVELOPMENT

CRITICAL PERSPECTIVES

Springer Science & Business Media Urban planning is a complex field of knowledge and practice. Through the decades, theoretical debate has formed an eclectic set of possible perspectives, without finding, in our opinion, a coherent paradigmatic framework which can adequately guide the interpretation and action in urban planning. The hypothesis of this book is that the attempts of founding an autonomous planning theory are inadequate if they do not explore two interconnected fields: architecture and public policies. The book critically reviews a selected set of current practices and theoretical founding works of modern and contemporary urban planning by highlighting the continuous search for the epistemic legitimization of a large variety of experiences. The distinctive contribution of this book is a documented critique to the eclecticism and abstraction of the main international trends in current planning theory. The dialogic relationship with the traditions of architecture and public policy is proposed here in order to critically review planning theory and practice. The outcome is the proposal of a paradigmatic framework that, in the authors' opinion, can adequately guide reflections and actions. A pragmatic and interpretative heritage and the project-orientated approach are the basis of this new spatial planning paradigm.

ACTIVISTS IN CITY HALL

THE PROGRESSIVE RESPONSE TO THE REAGAN ERA IN BOSTON AND CHICAGO

Cornell University Press In 1983, Boston and Chicago elected progressive mayors with deep roots among community activists. Taking office as the Reagan administration was withdrawing federal aid from local governments, Boston's Raymond Flynn and Chicago's Harold Washington implemented major policies that would outlast them. More than reforming governments, they changed the substance of what the government was trying to do: above all, to effect a measure of redistribution of resources to the cities' poor and working classes and away from hollow goals of "growth" as measured by the accumulation of skyscrapers. In Boston, Flynn moderated an office development boom while securing millions of dollars for affordable housing. In Chicago, Washington implemented concrete measures to save manufacturing jobs, against the tide of national policy and trends. *Activists in City Hall* examines how both mayors achieved their objectives by incorporating neighborhood activists as a new organizational force in devising, debating, implementing, and shaping policy. Based in extensive archival research enriched by details and insights gleaned from hours of interviews with key figures in

each administration and each city's activist community, Pierre Clavel argues that key to the success of each mayor were numerous factors: productive contacts between city hall and neighborhood activists, strong social bases for their agendas, administrative innovations, and alternative visions of the city. Comparing the experiences of Boston and Chicago with those of other contemporary progressive cities-Hartford, Berkeley, Madison, Santa Cruz, Santa Monica, Burlington, and San Francisco-Activists in City Hall provides a new account of progressive urban politics during the Reagan era and offers many valuable lessons for policymakers, city planners, and progressive political activists.

STRATEGIES FOR URBAN DEVELOPMENT IN LEIPZIG, GERMANY

HARMONIZING PLANNING AND EQUITY

Springer Science & Business Media The demographic pressure caused by migration offers a considerable challenge for urban centers today. It results in an uneven development of the community and focus of urban planners becomes how to provide decent, low-cost housing and transportation in order to facilitate the integration of poorer residents among the rest of the community. In large industrialized countries the challenges of urban policy-makers are made even more complicated since these governments depend on state or federal legislators to obtain the massive amounts of funding required for adequately addressing these local issues that are in global cause. The book analyzes the strategies for urban development in Leipzig, Germany, and shows how civic leaders were able to harmonize planning and equity. They relied heavily on two interesting approaches in that process: the promotion of culture as a key component of urban development and the reconciliation of the inevitable process of gentrification with social equity. The book also looks at the globalization aspect of urban development, reviews research in social equity in urban development in Europe and the United States and describes sustainability as an important element of urban renaissance.

THE NEIGHBORHOOD WORKS

PRESERVING THE LEGACY

CONCEPTS IN SUPPORT OF SUSTAINABILITY

Lexington Books Though only a relatively recent topic of worldwide discussion and interest, the concept of sustainable development traces its origins to the late eighteenth century, when concern for resource conservation and environmental integrity first arose. From this beginning, the concern for sustainable development progressively expanded from being purely local to having a regional and national relevance, and finally to being a global concern of import. Preserving the Legacy examines this expansion, while discussing several general approaches to the understanding and application of the concept of sustainability. Also discussed are such weighty issues as the balancing of development aspirations with environmental management in developing countries, and the means by which residents in an urbanizing region in a developed country can be induced to consider sustainable development as both a goal and a limiting factor in the conversion of agricultural land. Offering both real-world examples of sustainability issues and a forecast for the future of sustainability theory and practice, this fascinating volume will prove invaluable to scholars of the environment, geography, and urban planning.

PLACE-MAKING AND URBAN DEVELOPMENT

NEW CHALLENGES FOR CONTEMPORARY PLANNING AND DESIGN

Routledge The regeneration of critical urban areas through the redesign of public space with the intense involvement of local communities seems to be the central focus of place-making according to some widespread practices in academic and professional circles. Recently, new expertise maintains that place-making could be an innovative and potentially autonomous field, competing with more traditional disciplines like urban planning, urban design, architecture and others. This book affirms that the question of 'making better places for people' should be understood in a broader sense, as a symptom of the non-contingent limitations of the urban and spatial disciplines. It maintains that research should not be oriented only towards new technical or merely formal solutions but rather towards the profound rethinking of disciplinary paradigms. In the fields of urban planning, urban design and policy-making, the challenge of place-making provides scholars and practitioners a great opportunity for a much-needed critical review. Only the substantial reappraisal of long-standing (technical, cultural, institutional and social) premises and perspectives can truly improve place-making practices. The pressing need for place-making implies trespassing undue disciplinary boundaries and experimenting a place-based approach that can innovate and integrate planning regulations, strategic spatial visioning and urban development projects. Moreover, the place-making challenge compels urban experts and policy-makers to critically reflect upon the physical and social contexts of their interventions. In this sense, facing place-making today is a way to renew the civic and social role of urban planning and urban design.

THE ASHGATE RESEARCH COMPANION TO PLANNING THEORY

CONCEPTUAL CHALLENGES FOR SPATIAL PLANNING

Routledge At a time of potentially radical changes in the ways in which humans interact with their environments - through financial, environmental and/or social crises - the raison d'être of spatial planning faces significant conceptual and empirical challenges. This Companion presents a multidimensional collection of critical narratives of conceptual challenges for spatial planning. The authors draw on various disciplinary traditions and theoretical frames to explore different ways of conceptualising spatial planning and the challenges it faces. Through problematising planning itself, the values which underpin planning and theory-practice relations, contributions make visible the limits of established planning theories and illustrate how, by thinking about new issues, or about issues in new ways, spatial planning might be advanced both theoretically and practically. There cannot be definitive answers to the conceptual challenges posed, but the authors in this collection provoke critical questions and debates over important issues for spatial planning and its future. A key question is not so much what planning theory is, but what might planning theory do in times of uncertainty and complexity. An underlying rationale is that planning theory and practice are intrinsically connected. The Companion is presented in three linked parts: issues which arise from an interactive understanding of the relations between planning ideas and the political-institutional contexts in which such ideas are put to work; key concepts in current theorising from mainly poststructuralist perspectives and what discussion on complexity may offer planning theory and practice.

REVITALIZING URBAN NEIGHBORHOODS

Studies in Government & Public Since the 1950s and the advance of urban renewal, local governments and urban policy have focused heavily on the central business district. However, such development has all but ignored the inner-city neighborhoods that continue to struggle in the shadows of high-rise America. This analysis of urban neighborhoods in the United States from 1960 to 1995 presents fifteen essays by scholars of urban planning and development. Together they show how urban neighborhoods can and must be preserved as economic, cultural, and political centers.

PLACE MATTERS

METROPOLITICS FOR THE TWENTY-FIRST CENTURY

Analyzes the problematic trends facing America's cities and older suburbs and challenges us to put America's urban crisis back on the national agenda.

ECONOMIC REVITALIZATION

CASES AND STRATEGIES FOR CITY AND SUBURB

SAGE Economic Revitalization is unique in that it discusses leading revitalization strategies in the context of both city and suburban settings, offering case studies of programme development and implementation. The book is aimed at students and practitioners of economic development planning who seek to foster stronger economies and greater opportunity in inner cities and older suburbs. It is also meant to assist planners in thriving new towns and suburban communities seeking to avoid future economic decline as their communities mature. Economic Revitalization: - Discusses practices in both

suburban and inner-city settings - Integrates the planning values of social justice and sustainability into the discussion of implementation strategies - Includes cases that reveal the political nature of the planning process and the types of tradeoffs that often must be made - Provides insights for planners seeking to adopt "best practice" programs from other localities

FROM THE STUDIO TO THE STREETS

SERVICE-LEARNING IN PLANNING AND ARCHITECTURE

Stylus Publishing, LLC. Architecture should be the ideal field of study for applying to service learning since it requires mastery of theoretical concepts for direct application to human situations and needs. Though architecture has long fostered learning by doing, it is only recently that the field's hands-on aspects have been subjected to more systematic appraisal. This book is the first book to make a formal connection between service learning pedagogy and architectural practice, and to address the related issues, both professional and ethical. This book looks equally at the emergence in the sixties of planning departments out of schools of architecture, and at planning's shift in orientation away from "master planning," elite designers, and signature buildings to the mainstream acceptance of neighborhood-based planning and socially engaged practice. This turn has led to far more widespread adoption of service learning in planning programs. The chapters in this book illustrate how service learning can be used to develop a wide range of professional skills in students, including land use and building condition surveys, zoning analysis, demographic analysis, cost estimating, public presentation, site planning, urban design, participatory design processes, public workshops, and design charrettes as well as measured drawings of existing buildings. The author demonstrates how community design programs are more than service activities; and how they can be models of interdisciplinary teamwork, often involving planners, urban designers, and landscape architects as well as scholars and researchers from related fields. The essays in this book offer insights into both successful initiatives and roadblocks along the way and address the practicalities of the use of this powerful pedagogy.

INTERNATIONAL BIBLIOGRAPHY OF SOCIOLOGY 1995

Psychology Press The IBSS is the essential tool for librarians, university departments, research institutions and any public or private institution whose work requires access to up-to-date and comprehensive knowledge of the social sciences.
