### SIMPLE & EASY STOCK TRADING STRATEGIES

---

#### SIMPLE & EASY STRATEGIES ANY BEGINNER CAN LEARN FAST

---

**Createspace Independent Publishing Platform** I have seen brand new investors and traders around the world waste a serious amount of valuable education and training time on learning information that will not do them any good and can even cause them to lose some of their hard earned money right away in the live markets. No one wants that however it is a huge mistake that virtually all brand new traders make because they don't know any better, after reading this book you will. I don't care where you trade from or what you trade, Dubai to Detroit or Mumbai to Manhattan doesn't matter because a chart is a chart and supply and demand is supply and demand, period, live markets don't work any other way no matter where in the world you are or what your trading even camels or goats. New traders all around the world spend waaaay too much time on looking for the magical combination of indicators, settings and colors they think will show them something that is going to help them make more money. There are no shortcuts or bells that go ding to tell you to enter the right position so stop looking right now and if you are using something like that and you're losing money that is why. All you need to see is right in front of you on the price chart and that is price and time. Those are the only things that professional traders care about and nothing else. You can certainly use your chart like a crystal ball to tell you where price will go with a high degree of certainty. When you are done reading this book you will have an excellent basic explanation of what and what not to do before you even study anything or do any kind of education. The information in this book will put you on the fast track to becoming a successful self-directed investor and trader no matter where you trade from in the world or what you trade with very little money invested. This book gives you the brutal and harsh truth of what happens in real life, in real time and in real money in the worlds live markets every day. There are no short cuts and you must do the time if you want to drive your own money train to the bank.

### LEARN THE BEST STRATEGIES ON HOW TO PROFIT USING TRADING TACTICS, TOOLS, PSYCHOLOGY, MONEY MANAGEMENT AND GENERATE PASSIVE INCOME

---

**Michael Branson** Understanding how financial markets work is crucial to making sure that global and economic markets are stable. Market participants (traders) vary due to their capital endowment, financial motivation and the type of trading activity. Each activity is also subject to different regulations depending on how sensitive it is and the country that it is based. One of the trading strategies that many traders have come to love is day trading. This is a process whereby you buy and sell stocks on the same trading day. This is different from other types because the trading activity continues even after the marketing hours have closed. Traders that buy and sell using this method of trading are called day traders. The time allows you to run dozens of trades in a single day or run a single trade. You might decide to buy a stock the first day and then sell it the next day, that is if you realize that selling the same day might not prove profitable. The standard practice is for traders to close trades at the end of the day. Trades usually last a few minutes or seconds. These traders do this because they want to avoid any risks that arise out of price gaps between the closing price on the day of buying the stock and the opening price of the next day. Just like any other day, these traders make quick profits and also quick losses in such a short period of time. The good thing is that day trading gives you a chance to make decisions based on analysis of patterns. Day traders study the general market and the price and volume movement of the stocks. They then use fundamental and technical analysis to keep themselves abreast with the latest news items in order to make the right decisions. With the right decisions come better profits and satisfaction from all you do on the market.

### **DAY TRADING FOR BEGINNERS: HOW TO TRADE AND MAKE MONEY WITH DAY STRATEGY THROUGH A BEGINNER GUIDE TO LEARN THE BEST STRATEGIES FOR CREATING YOUR PASSIVE INCOME FOR A LIVING. INCLUDES TIPS AND TRICKS**

Are you looking for a complete guide on day trading? Then Keep reading... Before you begin day trading, you need first to understand what it is not. It's not investing, which is buying a stake in some asset that you hope will build a profit over a long period. The length of time is subjective, but the most investor will typically hold onto assets for several years, sometimes decades. They are also normally concerned with what business they choose to invest in. They look into companies to make sure they avoid litigation, have strong products, pay off debts, and make solid profits. Day trading is, pretty much, the opposite. It involves buying and selling stock in a single day. These types of traders will borrow money so they can take advantage of little price changes in highly liquid indexes and stocks. Even still, they tend to follow the same type of wisdom that longer-term investors: Buy low and sell high, day traders just do it in a smaller time frame. A typical day trader's day may look something like this. A day trader decides to buy 1,000 shares in stock they like at 10 am. Then when the process begins to rise at 10:15, they sell it. If the stock was up by half when they sell, then they have made \$500, minus the commission. Let's say the trader is using Scottrade; the commission could range from \$7 to \$27, which would mean they would make a net profit of \$493 to \$473. Then the trader would have to take into consideration their taxes. Whenever you sell an investment that you have owned for less than a year, it is taxed based on your personal gain rate, and this can sometimes be as high as 35%. Long-term gains aren't taxed any higher than 20%. That makes tax planning extremely important in the day trading world. This book covers the following topics: Why learning day trading today is an opportunity? What is day trading and how to get started? Interest rates Retail vs institutional traders Advantage and negatives of day trading Types of trading Platforms and broker What is an option contracts Call and put option on the stock market Volatile in the markets Day trading and swing trading Candlestick Day trading strategies And Much More If you think the profit looks small, keep in mind a day trader doesn't just make a couple of trades in a day, they will make 25 to 30. That means they multiply their profits by having a high trade volume. To help them minimize risks, they won't normally keep a stock overnight because it can change a lot during that period. Corporate announcements and news events will drive the volatility of the market, so the trader needs to be available and able to respond at the drop of a hat. Unlike a long-term investor who waits until they think things through and receives more information, day traders move quickly and make decisions in just a couple of minutes or seconds. #### **A BEGINNER'S GUIDE TO MAKE MONEY WITH DAY TRADING. LEARN HOW TO BECOME A PROFITABLE INVESTOR AND CREATE PASSIVE INCOME WITH EASY AND PROVEN STRATEGIES**

*Are you looking for a definite method for making day trading your source of income? Then keep reading... Day trading is the buying and selling of securities in one single trading day. This can occur in any type of marketplace that you choose, but it is most common in the stock market and the forex market. Day trading is very fast-paced. You will purchase a stock, bond, option or other security at some point during the day. Then, sometime during the same day, you will sell the security. If you watched the market correctly and the trade goes well, you will make a profit from that sale. If you made a mistake with your calculations, you will lose money. Day trading is a strategy of trading financial securities, such as stocks and currencies, where positions are taken and closed within the same day. Also called short trading, it involves buying financial securities and selling them before the trading day closes. How short can day trading last? It can be as short as buying and selling in a few minutes, or even seconds! The point is to end the trading day with a square position, i.e., neither long nor short on any financial security. It doesn't matter how many trades you do during the day. You can trade just once a*

day or ten times a day...it doesn't matter. The defining characteristic of day trading is ending the day with a square position. ### A BEGINNER'S GUIDE TO TRADING TOOLS AND TACTICS, MONEY MANAGEMENT, DISCIPLINE AND TRADING PSYCHOLOGY

---

**Createspace Independent Publishing Platform** Very few careers can offer you the freedom, flexibility and income that day trading does. As a day trader, you can live and work anywhere in the world. You can decide when to work and when not to work. You only answer to yourself. That is the life of the successful day trader. Many people aspire to it, but very few succeed. Day trading is not gambling or an online poker game. To be successful at day trading you need the right tools and you need to be motivated, to work hard, and to persevere. At the beginning of my trading career, a pharmaceutical company announced some positive results for one of its drugs and its stock jumped from \$1 to over \$55 in just two days. Two days! I was a beginner at the time. I was the amateur. I purchased 1,000 shares at \$4 and sold them at over \$10. On my very first beginner trade, I made \$6,000 in a matter of minutes. It was pure luck. I honestly had no idea what I was doing. Within a few weeks I had lost that entire \$6,000 by making mistakes in other trades. I was lucky. My first stupid trade was my lucky one. Other people are not so lucky. For many, their first mistake is their last trade because in just a few minutes, in one simple trade, they lose all of the money they had worked so hard for. With their account at zero, they walk away from day trading. As a new day trader you should never lose sight of the fact that you are competing with professional traders on Wall Street and other experienced traders around the world who are very serious, highly equipped with advanced education and tools, and most importantly, committed to making money. Day trading is not gambling. It is not a hobby. You must approach day trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends. Rolling out of bed and throwing water on your face 15 minutes before the opening bell just does not give you sufficient time to be prepared for the market's opening. Sitting at your computer in your pajamas or underwear does not put you in the right mindset to attack the market. I know. I've experienced all of these scenarios. In *How to Day Trade for a Living*, I will show you how you too can take control over your life and have success in day trading on the stock market. I love teaching. It's my passion. In this book, I use simple and easy to understand words to explain the strategies and concepts you need to know to launch yourself into day trading on the stock market. This book is definitely NOT a difficult, technical, hard to understand, complicated and complex guide to the stock market. It's concise. It's practical. It's written for everyone. You can learn how to beat Wall Street at its own game. And, as a purchaser of my book, you will also receive a membership in my community of day traders at [www.vancouver-traders.com](http://www.vancouver-traders.com). You can monitor my screen in real time, watch me trade the strategies explained in his book, and ask questions of me and other traders in our private chat room. I invite you to join me in the world of day trading. I'm a real person who you can connect with. I'm not just a photograph here on the Amazon site. I love what I do. You can follow my blog post under Author Updates on my Author page on Amazon. It's honest. You'll see I lose some days. You can read the reviews of my book. I know you will learn much about day trading and the stock market from studying my book. You can join at no cost and with no obligation my community of day traders at [www.vancouver-traders.com](http://www.vancouver-traders.com). You can ask us questions. Practical, hands-on knowledge. That's *How to Day Trade for a Living*.

Or would you simply like to learn about short trading tactics just to diversify your investment strategy? If you are a really ambitious person and find yourself in one of the above situations, then Day Trading could be a really effective option for you. Let me explain why... What Day trading implicates is to make trades that last for a short stretch of time which results in gaining an advantage over short-term fluctuations in an asset's value due to the fact that positions begin and close in the same day. On the other hand, day traders can make 0.5% to 3% per day on their capital that could result in 10 percent to 60 percent per month. So what are the best strategies to use for making these spectacular profits?
